<i>Hour Action Plan (WHAP) from last certification cycle?</i>		<i>explain to facility WRAP's Zero Tolerance Policy for facilities & monitors?</i>	
<i>Q. Name & title of facility representative:</i>	Mr. Ahmed El Deeb / Compliance Manager		
<i>R. Names & titles of other attendees at the Closing Meeting:</i>	Mr. Mohamed Lotfy / HR Manager Mr. Mostafa Mahmoud / HSE Officer Mr. Mahmoud Kotb / General Manager		

Facility name:	Sahinler Egypt – Private Free Zone	WRAP ID:	10886
Facility address:	1,12,13,14 Block 10 and 6,7 Block 16 3rd Industrial Zone, New Borg El Arab City - Alexandria, Egypt	Audit date(s):	February 16, 2025 Desktop review: March 13, 2025

SECTION II: CORRECTIVE ACTION PLAN

**If no non-compliances or observations were raised, simply note “No NC”
AND lead auditor and facility representative *still* need to sign this document.**

This “Corrective Action Plan” shall be used to summarize all facility non-compliances and observations and to document a corrective action plan that both the auditor and facility management believe is reasonable to ensure compliance, realignment and continuous adherence to WRAP’s Principles and local/national laws.

This form should be used in the following manner:

- Document all non-compliances and observations individually on the form below, prior to the closing meeting and use the form as an agenda during the closing meeting;
- During the closing meeting, ensure that management understands the findings;
- Management shall come up with its own corrective actions for all non-compliances and observations;
- Each non-compliance must be rated as follows:

Major

- Systematic violations of local/national law and/or WRAP Principles, and/or any health and safety condition that might pose significant risk to workers’ basic rights and/or safety
- Failure of management systems, including excessive minor non-compliances that reveal an underlying dysfunction
Note: If there are several minor non-compliances against the same Principle, it may warrant a major non-compliance on internal monitoring (i.e. Q1.4a)
- Non-transparency
- Issues that require on-site verification, especially those that can only be fully validated with worker interviews and/or addressed through worker training
- Failure of addressing, within the projected completion date, non-compliances raised during the initial/follow-up audits in this audit cycle

Minor

- Occasional or isolated violations of local/national law and/or WRAP Principles that do not seriously compromise workers’ basic rights and/or safety
- Non-compliances that do not require onsite verification, worker interviews and/or worker training
- Minor situations that do not affect a large number of workers

Observation

- Currently not a non-compliance but could potentially become one if timely actions are not taken (internal monitoring can help identify such issues); for example, certificates/permits that are valid during the audit but look set to expire in the near future with no indication that the facility has taken the steps necessary to ensure timely renewal. In addition, under certain circumstances (outlined in detail under WRAP Principle 6), excessive working hours will also be noted as an observation (instead of a non-compliance)

Facility name:	Sahinler Egypt – Private Free Zone	WRAP ID:	10886
Facility address:	1,12,13,14 Block 10 and 6,7 Block 16 3rd Industrial Zone, New Borg El Arab City - Alexandria, Egypt	Audit date(s):	February 16, 2025 Desktop review: March 13, 2025

Corrective Action Plan

Please document only one non-compliance/observation per row.

NC # & rating (Major, Minor or Observation)	WRAP clause number (e.g., Q8.4) and relevant local/national laws	Non-compliances	A. Facility's corrective action plan B. Projected completion date C. Responsible person's name and title
1 & Minor Closed	Principle 8 – Health and safety: Health and safety overview: WRAP Principle: 8.4a: Local/national laws: N/A	During the documents review and management interview, we verified that the H&S risk assessment which was conducted on January 1, 2025 did not cover risks related to nursing mothers. Desktop review on March 13th of 2025 On March 13 th of 2025, the factory sent us for our review, the photographic evidence of its resolution of this issue, evidence confirming that the factory has now updated the H&S risk assessment on March 12, 2025 and has added the risks related to nursing mothers.	A. The facility agreed that they will add the risks related to nursing mothers in the risk assessment. B. March 16, 2025 C. Mr. Ahmed El Deeb / Compliance Manager Closed
2 & Minor Closed	Principle 8 – Health and safety: Electrical safety: WRAP Principle: 8.31d: Local/national laws: N/A	During the onsite tour, we verified that 3 electrical panels in the cutting workshop were not supported with the warning sign. Desktop review on March 13th of 2025 On March 13 th of 2025, the factory sent us for our review, the photographic evidence of its resolution of this issue, evidence confirming that the factory has now posted the warning signs on the electrical panels in the cutting workshop.	A. The facility agreed that they will post the warning signs on the electrical panels in the cutting workshop. B. March 16, 2025 C. Mr. Ahmed El Deeb / Compliance Manager Closed

Facility name:	Sahinler Egypt – Private Free Zone	WRAP ID:	10886
Facility address:	1,12,13,14 Block 10 and 6,7 Block 16 3rd Industrial Zone, New Borg El Arab City - Alexandria, Egypt	Audit date(s):	February 16, 2025 Desktop review: March 13, 2025

3 & Minor Closed	Principle 8 – Health and safety: Fire Safety: WRAP Principle: 8.40d: Local/national laws: N/A	During the onsite tour, we verified that some emergency exit aisles were not marked in the cutting workshop and sewing workshop. Desktop review on March 13th of 2025 On March 13th of 2025, the factory sent us for our review, the photographic evidence of its resolution of this issue, evidence confirming that the factory has now marked the exit aisles in the cutting and sewing workshops.	A. The facility agreed that they will mark the exit aisles in the cutting and sewing workshop. B. March 16, 2025 C. Mr. Ahmed El Deeb / Compliance Manager Closed
4 & Minor Closed	Principle 8 – Health and safety: Machine safety: WRAP Principle: 8.63: Local/national laws: N/A	During the onsite tour, we verified that the sewing machines were not supported with the safety warnings in the workers' language in the sewing workshop. Desktop review on March 13th of 2025 On March 13th of 2025, the factory sent us for our review, the photographic evidence of its resolution of this issue, evidence confirming that the factory has now posted the warning signs on the sewing machines in workers' language in the sewing workshop.	A. The facility agreed that they will post the warning signs on / beside the sewing machines in workers' language in the sewing workshop. B. March 16, 2025 C. Mr. Ahmed El Deeb / Compliance Manager Closed
5 & Minor Closed	Principle 12 – Security: Education, Training & Awareness: WRAP Principle: 12.12.3: Local/national laws: N/A	During the documents review and management interview, we verified that the factory did not train its relevant personnel on its cyber security policies and procedures. Desktop review on March 13th of 2025 On March 13th of 2025, the factory sent us for our review, the photographic evidence of its resolution of this issue, evidence confirming that the factory has now trained its relevant personnel on its cyber security policies and	A. The facility agreed that they will train its relevant personnel on its cyber security policies and procedures. B. March 16, 2025 C. Mr. Ahmed El Deeb / Compliance Manager Closed

Rec

Audit #: 10915, Factory: Sahinler Egypt - Private Free Zone,
Address Line 1: 1,12,13,14 Block 10 and 6,7 Block 16 3rd Industrial
Zone, City: New Borg Al Arab, Country: Egypt, Approval Status:
Completed

The factory consists of 2 buildings. The total land area is 20,995 sq. meters.

Building# 1 is a one-story building with a mezzanine floor for admin offices of 6,000 sq. meters and is 19 years old;
1F: Sewing workshop, ironing workshop, inline QC workshop, final QC workshop, packing workshop, final packing
workshop, finished goods warehouse, clinic room, and chemicals store area, dining area and lockers' room.

Building# 2 is a two-story building with a mezzanine floor for admin offices of 7,000 sq. meters and is 1 year old;
1F: Raw materials warehouse, cutting workshop and fabric inspecting workshop.
2F: not occupied yet and will be extension for more production lines.

The factory has 5 compressors located in separate sheds attached to the main buildings.

31. Does the facility share a building with other facilities/businesses? (If yes, describe in detail)	No
---	----

There are no other factories that share the same building with the audited factory.

32. If Yes to 31, does the facility conduct a joint evacuation drill with other facilities/businesses?	N/A
--	-----

N/A.

33. Does the facility share any workers or production processes with other facilities? (If yes, describe in detail)	No
---	----

N/A.

34a. Does the facility have a change in number of workers in the past 12 months? (If yes, list % change and explain)	Yes
--	-----

In March 2024, the number of workers was 874. And it increased by 14.4% this year, thus the number of workers was 1,000 in February 2025. The number of workers increased because of new job orders and new production plans.

34b. Does the facility have a change in square footage in the past 12 months? (If yes, explain)	Yes
---	-----

The factory has built a new building for cutting workshop, fabric warehouse, fabric inspecting workshop, and extension plan for sewing production lines. The square footage of the factory was 10,000 square meters in 2024 and after adding the new building in January 2025, the total land area is 20,995 square meters. The new building is 100 m away from the factory as it is located in the opposite land from the factory.

34c. Does the facility have any significant structural changes in the past 12 months? (If yes, describe)	No
--	----

The facility doesn't have any significant structural changes in the past 12 months.

34d. Does the facility have a change in management/ownership in the past 12 months? (If yes, describe)	No
--	----

There is no change in the facility's management / ownership in the past 12 months.

34e. Does the facility have a name change in the past 12 months? (If yes, describe)

No

There is no change in the facility's name in the past 12 months.

35. Regular workdays (e.g., Mon-Sat):

Saturday to Thursday.

36. Weekly rest day(s):

Friday.

37. List daily shifts, incl. night production:

The factory works in 1 shift from 07:30 to 15:30.

38. Factory's peak season(s):

No obvious peak season in the past 12 months.

39. List the number and duration of daily legally required breaks:

1 break and its duration is 60 minutes from 10:30 to 11:30.

40. What is the lowest wage level paid for a regular work week/month?

Above the legal minimum

Above minimum.

41. Are all relevant records, incl. wage and attendance records, kept in the audited facility for review? (If No, explain)

Yes

The relevant records including wage and attendance records are kept in the audited facility for review.

42. Are there dorms/apartments provided for workers/management?

No

The factory does not have dormitories.

43a. If Yes to 42, who's providing the dorms?

N/A

N/A.

43b. Full description of dormitories/apartments if applicable:

The factory does not have dormitories.

44. % of workforce residing in dorms/apartments:

N/A.

45. What form of worker representation exists in the facility? (Note: Some form of worker representation must exist to address workplace grievances.)

Worker Committee

The factory has 7 workers' representatives (males) who were elected on December 27, 2023. The workers' committee is managed by Mr. Mahmoud Ahmed. The committee's name: Sahinler Committee.

Principle 1: Compliance with Laws and Workplace Regulations

Facilities will comply with laws and regulations in all locations where they conduct business.

All facilities will comply with the legal requirements and standards of their industry under the local and national laws of the jurisdictions in which the facilities are doing business, along with any applicable international laws. This will cover all labor and employment laws of those jurisdictions, as well as laws governing the conduct of business in general, including rules and standards of ethics dealing with corruption and transparency, and any relevant environmental laws.

1.1a. Does the facility comply with all relevant local and national laws?	Yes
---	-----

Yes, the factory is in compliance with the legal requirements and regulations as per the Egyptian labor law and in compliance with relevant WRAP principles.

1.1b. Does the facility comply with all labor and enforcement laws?	Yes
---	-----

During the audit course, it was verified that the factory is in compliance with employment laws and regulations, hiring processes, ethical practices, anti-bribery/anti-corruption laws and environmental requirements.

1.1c. Is the facility's hiring process in accordance with the law?	Yes
--	-----

It was evident that the factory has well organized hiring practices in accordance to laws and regulations. The hiring practices are monitored and managed by the HR team headed by Mr. Mohamed Lotfy / HR Manager.

1.1d. Is any of the facility's hiring done under government sponsorship?	No
--	----

No, the hiring practices and HR procedures are done by the HR team and monitored by the government and the labor office officials (New Borg El Arab / Alexandria labor office).

1.1e. Has the facility received incentives to hire/train workers from private or government sponsored programs?	No
---	----

It was observed during management, the worker interviews, and the documentary review that the factory does not hire or train workers under private or government-sponsored programs.

1.1f. Does the facility comply with all ethics, anti-bribery, and anti-corruption laws?	Yes
---	-----

During the audit course, it was verified that the factory is in compliance with ethics, anti-bribery and anti-corruption law.

1.1g. Does the facility comply with all environmental laws?	Yes
---	-----

During the audit course, it was verified that the factory is in compliance with environment law.

1.2a. Does the facility obtain current information on all relevant laws and regulations concerning each of the Principles and incorporate this information in its business practices?	Yes
---	-----

The factory has written policies and procedures which define and address all 12 WRAP principles and legal requirements; this was verified during the documentary review and management interviews. The factory policies and

Completed

procedures # Sahinler SOP; last reviewed on November 5, 2024. The factory has a direct connection with the local labor office to update them with all recent legal updates on a regular basis by email or by onsite visits. The factory incorporates legal information and WRAP principles in its business practices by implementing internal monitoring systems and policies. The factory has an updated copy of the Egyptian labor laws and regulations. The factory communicates these regulations and policies with workers through announcement boards and internal refresher awareness training courses.

1.2b. Does the facility have written policies and procedures for current information on all relevant laws and regulations on all 12 WRAP Principles?

Yes

Through the documentary review, we found that the facility has established written policies and procedures for current information on all relevant laws and regulations on each of the following WRAP Principles to ensure compliance with all relevant laws and regulations and all 12 WRAP principles.

1.2c. Does the facility have a qualified person responsible for informing the facility and its workforce of changes to laws and regulations, or access to current publications on all relevant labor laws? (List their name and job title)

Yes

Name and job title: Mr. Ahmed El Deeb / Compliance Manager and Mr. Mohamed Lotfy / HR Manager are responsible for providing the factory and its admin staff with all updates concerning the legal requirements and its legislations.

1.2d. When was the last time a major update in laws and regulations occurred in the last 12 months? (List all major changes that are relevant, e.g., an increase in minimum wage effective in January 2021)

In January 2024, the legal minimum wage was raised to be 3,500 EGP per month. In June 2024, the legal minimum wage was raised to be 6,000 EGP per month.

1.3a. Does the facility have a policy ensuring that a worker can raise workplace concerns without fear of retaliation?

Yes

Through interviews with the workers and documentary review, we confirmed that the factory has a policy to ensure that workers can raise workplace concerns without fear of retaliation using grievance box and workers' representatives.

1.3b. What procedures does the facility have in place to implement the policy?

The factory has grievance boxes, workers representatives and open door policy as communication channel with workers. The grievance boxes are opened on a weekly basis by Mr. Mohamed Lotfy / HR Manager.

1.4a. Does the facility conduct internal monitoring of its management system at least twice (02) a year? When was the last internal monitoring the facility conducted?

Yes

The factory has an internal monitoring system for each management system which is done every 6 months covering all the internal procedures and practices, WRAP principles, HR practices and national laws. During the documentary

Completed

review, we confirmed that the last internal monitoring report was done on February 15, 2025 by Mr. Mohamed Lotfy / HR Manager.

1.4b. Does the scope of these internal monitoring activities cover whether their written procedures and processes are meeting the requirements of local/national law and WRAP 12 Principles?

Yes

Yes, the internal monitoring system covers all internal procedures and processes in order to make sure that they meet the legal requirements and WRAP principles.

1.4c. Were the results of the internal monitoring communicated with top management?

Yes

Through interviews with the management and documentary review, we confirmed that the results of the internal monitoring were communicated with top management by attending the management representatives during the meeting, and after their signatures as acknowledgment.

1.4d. What were the findings from the last internal monitoring? List all findings regardless of whether they were corrected or not.

During the factory walkthrough, it was noted that there were no findings raised during the last internal monitoring.

1.4e. Were all the findings corrected? Provide details in the comment section.

N/A

During the documents review, we verified that there were no findings raised during the last internal monitoring.

1.5. During the previous two years, has the facility had any notices of noncompliance levied against it (including any legal proceedings or outstanding allegations concerning the facility's operations)?

No

During the past two years, the factory has had no notices of non-compliance levied against it, including legal proceedings or outstanding allegations concerning its operations.

Subcontracting

Subcontracting

Note: A facility is subcontracting when it appoints another facility to undertake part of the production processes for the manufacturing of goods. It involves circumstances where goods leave the facility to be partially completed and then sent back so the goods can be completed. Other services may also be subcontracted.

1.6. Does the facility subcontract any of its production operations? If the facility used subcontracting in the past 12 months but does not do so now, note this under this question. List the subcontracted production process(es). List the name(s) and address(es) of subcontractor(s).

No

During the audit, we verified that the factory has not subcontracted any of its production operations.

Audit #: 10915, Factory: Sahinler Egypt - Private Free Zone,
Address Line 1: 1,12,13,14 Block 10 and 6,7 Block 16 3rd Industrial
Zone, City: New Borg Al Arab, Country: Egypt, Approval Status:
Completed

1.7. Does the facility subcontract any other operations (such as canteen staff, security personnel, shipping services, cleaning staff, logistics, labor suppliers, etc.)? List the subcontracted services and name(s) and address(es) of subcontractors. List the name(s) and address(es) of subcontractor(s).

No

During the audit, we verified that the factory has not subcontracted any other operations.

1.8. Has the facility informed the subcontractor(s) in writing of their obligations under the local/national labor law and WRAP's requirements?

N/A

The factory does not have any sub-contractor.

1.9. Does the facility keep the receipt of subcontractor's acknowledgment of these requirements? List the last time the acknowledgment was received.

N/A

The factory does not have any sub-contractor.

1.10. Does the facility regularly review its list of subcontractors to make sure it is up to date? List the last time the review was conducted.

N/A

The factory does not have any sub-contractor.

Facility's Suppliers

1.11. Has the facility informed its top three (3) raw material suppliers for finished goods, e.g., fabrics, yarn, or leather, (by the value of business transacted with them in the preceding 12 months), in writing, of the facility's expectation that the supplier runs its operations in accordance with local/national laws and WRAP's Principles? List the names and addresses in English and local language of the top three (3) finished goods raw materials suppliers.

Yes

We verified that the factory has informed its top three (3) raw material suppliers (by value), in writing, of the facility's expectation that the supplier runs its operations in accordance with local/national laws and WRAP's Principles. The top 3 raw materials suppliers are:

1- (Threads): Embee international for industries, located at Public free zone, Ismailia, Egypt.

شركة امبي انترناشيونال للصناعات، تقع في المنطقة الحرة العامة، الاسماعيلية، مصر.

2- (Fabric): Dejun Textile, located at Shanghai, China.

شركة ديجون تكستابل للقماش، تقع في مدينة شنغهاي، الصين.

3- (Threads): El Kekhia Group, located at Public Free Zone, Nasr City, Egypt.

شركة الكيخية للخياط، تقع في المنطقة الحرة العامة، مدينة نصر، مصر.

Quality Plan ([Principle 02: Prohibition of Forced Labor](#))

Audit Questions and Objective Evidence/Comments

Principle 2: Prohibition of Forced Labor

Facilities will not use involuntary, forced or trafficked labor.

Facilities will maintain employment strictly on a voluntary basis. Facilities will not use any forced, prison, indentured, bonded or trafficked labor. This will include ensuring that any workers they hire will be under labor contracts that fully comply with all relevant legal requirements and do not impose any form of coercion (including imposing substantial fines or loss of residency papers by workers leaving employment or restricting a worker's ability to voluntarily end his/her employment). In addition, workers should not be employed subject to any financial or collateral guarantee or debt security; any recruitment fees involved should be borne by facilities, not workers. Further, facilities will ensure that the workers' travel documents are not withheld, and that all written contracts are in a language understood by the workers.

2.1. Does the facility maintain a written procedure to avoid employing involuntary, forced, prison, indentured, bonded, or trafficked labor?

Yes

The factory has written policies and procedures which prohibit any form of forced, prison, indentured or bonded labour. The factory policies and procedures # Sahinler SOP; last reviewed on November 5, 2024.

2.2. Does the facility have a program and materials used to train relevant individuals, including all individuals responsible for the hiring process, on the facility's policies and procedures prohibiting forced, prison, indentured, bonded, or trafficked labor?

Yes

During the audit, we verified that the factory has a program and materials to train workers and employees on WRAP principles especially on forced and bonded labor prohibition. The last awareness training was done on December 7, 2024.

2.3a. Are all workers working at the facility voluntarily, including overtime hours?

Yes

Through the workers' interviews, we confirmed that all interviewed samples stated they work in the factory voluntarily, including the overtime hours.

Audit #: 10915, Factory: Sahinler Egypt - Private Free Zone,
Address Line 1: 1,12,13,14 Block 10 and 6,7 Block 16 3rd Industrial
Zone, City: New Borg Al Arab, Country: Egypt, Approval Status:
Completed

2.3b. Is there evidence indicating that the facility forces any person (all onsite workers, including contracted ones) to work under the threat of any penalty or sanction?	No
As per the workers' interviews and factory walkthrough, we confirmed that there is no kind of working under the threat of any penalty or sanction.	
2.3c. If production quotas are applicable, are workers required to reach a production target before ending the work shift?	N/A
During workers' interviews and documents review, we verified that the factory does not have a quota for its workers.	
2.4. Are there any indications that workers' movements are being restricted at any time, including, but not limited to, legal breaks, lunch break, and the use of toilet?	No
As per the workers' interviews and factory walkthrough, we confirmed that there were no kind of movement restrictions for workers.	
2.5a. Are there exaggerated security measures or logistics restricting freedom of movement in use at the facility?	No
As per the workers' interviews and factory walkthrough, there were no kind of movement restrictions for workers.	
2.5b. Are there exaggerated security measures or logistics restricting freedom of movement in the dorms/apartments?	N/A
During the audit, we confirmed that there are no dormitories in the factory.	
2.6. Were there any overt signs of fear or exaggerated obedience displayed by workers during the facility inspection?	No
No such case was noted during the audit process and the factory walkthrough.	
2.7. Do security personnel and management act in a non-threatening manner?	Yes
Through the on-site walkthrough, we verified that the security personnel and management do not act in a threatening way; they act in a normal manner.	
2.8. Are security guards posted for routine security reasons, in a proportionately logical number?	Yes
The security guards are posted for routine security tasks and in a proportionately logical number such as guarding, main doors, restricted areas monitoring and patrols.	
2.9. Are all security service agreements free of any language or terminology that may imply the existence of involuntary, forced, prison, indentured, bonded, or trafficked labor conditions?	Yes

WRAP - Audit Report

Rec

The factory does not use a security services company; they use their own hired security staff. The security contract we reviewed was completely free of that type of language and terminology.

2.10. Do job descriptions or individual contracts for security workers limit their tasks to routine security matters such as protection of facility property or facility personnel?

Yes

Yes, the security staff job description is limited to their tasks in the protection of factory property and personnel.

2.11. Are the doors and gates of the facility locked only after business hours and for housing security reasons and in compliance with applicable fire codes?

Yes

Through the workers' interviews and the documentary reviews, we confirmed that the doors and gates of the factory are only locked after normal business hours and housing security reasons and in compliance with applicable local and national fire codes.

2.12. Does the facility prohibit all relevant individuals, including any person under the facility's direction (such as security guards), from coercing workers in any way, or unnecessarily limiting workers' freedom of movements?

Yes

Through the workers' interviews and the documentary reviews, we confirmed that the factory strictly prohibits all persons under its direction from coercing its employees in any way, or unnecessarily limiting their freedom of movement, and that the employees' freedom of movement is unimpeded upon their shift's conclusion.

2.13. Are workers freedom of movement unimpeded upon their shift's conclusion?

Yes

Through the employee interviews and the documentary review, we confirmed that the workers' freedom of movement is unimpeded upon their shift's conclusion.

2.14. Is it mandatory for workers to use facility provided services, such as canteen, dorms, or transportation? (If Yes, provide details, assessing any fees associated with that, including how such fees are deducted)

No

Based on the worker interviews and observation on site, workers could use factory provided services, such as dining area, and transportation freely.

2.15a. Does the facility require all hiring documents (e.g., an employment application or contract) to include a statement affirming that applicants are seeking employment voluntarily and are not under threat of any penalty, coercion or debt security?

Yes

a. Before an employee enters the factory to work, he or she must sign a document entitled Labor Contract, in which the signer declares that he or she is working in this factory voluntarily.

b. According to the WRAP sampling guidelines, 30 workers were interviewed, and the file for each interviewee had a job application and evidence that the worker had applied for the job voluntarily.

2.15b. Does the facility require all hiring documents (e.g., an employment application or contract) to be signed by each applicant?	Yes
Based on the document review and employees' interviews, we confirmed that all hiring documentation such as the labor contracts and employment applications were signed by employees and the employer.	
2.15c. Does the facility require all hiring documents (e.g., an employment application or contract) to be maintained in the worker's personnel file?	Yes
During the audit, we noted that those hiring documents were maintained in the worker's personnel file and were available for review.	
2.16. Does the facility obtain proof that anyone seeking employment is legally entitled to work in the country of manufacture in accordance with national immigration laws?	Yes
During documents review and workers interviews, we verified that the factory has proof that anyone entitled to work in the country of manufacture is done in accordance with national immigration laws, and its regulations law.	
2.17a. Does the facility conduct adequate due diligence on labor brokers/agents used by the facility? Describe the policies and procedures used for vetting labor brokers/agents:	N/A
The factory does not use any labor agents/brokers in the hiring process, also there are no migrant workers used by the factory.	
2.17b. Does the facility obtain an executed statement from all labor brokers/ agents used by the facility stating that the brokers/agents are not supplying labor that is involuntary, forced, prison, indentured, bonded, or trafficked? Name(s) and contact info of any brokers/agents supplying labor to the facility and their business license:	N/A
During documents review and management interviews, we verified that the factory does not use labor brokers/agents.	
2.17c. Is facility's hiring process, in part or in whole, managed by a 3rd party? If yes, describe.	No
The factory's hiring procedures are not managed by a 3rd party.	
2.17d. Are any of the workers recruited from vocational training centers? If yes, describe the process and the name(s) of the center(s).	No
This factory recruits its own employees by employee referrals, job websites, or job markets, and does not recruit employees from vocational training facilities.	
2.17e. Were the basic terms of employment communicated to the migrant workers before they left their home country? Provide details about how this was done.	N/A

During documents review and workers' interviews, we verified that the factory does not have any migrant workers.

2.17f. Are migrant workers' activities monitored by a person besides their facility supervisor? If yes, describe.

N/A

N/A, during documents review and workers interviews, we verified that the factory does not have any migrant workers.

2.17g. Do migrant workers (whether domestic or foreign) pay fees or give collateral to brokers/agents/local government in the receiving country? If yes, state the relevant laws.

N/A

During documents review and workers interviews, we verified that the factory does not have any foreign or domestic migrant workers.

2.17h. If yes to g, describe the kinds of fees or collateral involved and how they are processed.

During documents review and workers' interviews, we verified that the factory does not have any foreign or domestic migrant workers.

2.17i. Does the facility have a plan to reimburse the fees directly to the affected workers? The reimbursement schedule must be over a reasonable period of time, not exceeding 3 years.

N/A

During documents review and workers interviews, we verified that the factory does not have any foreign or domestic migrant workers.

2.17j. If yes to 2.17i, how is the reimbursement distributed over the period of the plan?

N/A.

2.17k. Does the facility have detailed records demonstrating the fees have been reimbursed to the affected workers according to the plan?

N/A

During documents review and workers interviews, we verified that the factory does not have any foreign or domestic migrant workers.

2.18. Does the facility issue wages/ compensation directly to workers, or in an unambiguous system that clearly shows that the worker controls the destination of his/her wages and access to his/her wages?

Yes

The factory pays wages / compensation directly to its employees in bank transfer for all employees on a timely basis, on the 5th of each month.

2.19a. Does the facility provide pay advances or loans to workers?

Yes

During workers and management interviews, documents review we verified that the factory provides workers with loans according to the legal requirement and according to the worker's salary.

2.19b. If yes to 2.19a, is there a written policy about the terms and conditions in place?

Yes

WRAP - Audit Report

Yes, the factory has written detailed HR policies and procedures where they explain the process of providing loans to workers as per terms and conditions.

2.19c. Is the policy communicated clearly to workers?

Yes

Yes, it is communicated to workers through the announcement boards and explained to workers during the first day induction training.

2.19d. The terms and conditions shall not be used to bind workers to employment. Is there evidence that the facility is doing so?

No

During workers' interviews and documents review, we verified that the workers are allowed to take loans as per legal requirements in order to be paid back by workers in installments in periods that may reach 1 year or more as arranged with HR staff, and no kind of bonded or forced labor was noticed during the audit.

2.20. Does the facility hold original identification papers, travel documents, passports or other valuable personal items of their workers? If yes, provide details of relevant policies and procedures, including whether they involve any monetary deposit on the part of workers.

No

It is explicitly stated in the factory's policies and procedures that the factory is not allowed to hold the ID cards of its employees.

2.21. Does the facility require any worker deposits or have any payment withholding/ deduction practices, either directly or on behalf of labor brokers/agents? If yes, provide explanations on what these deposits or withholdings/deductions are for.

No

Through the employees' interviews, we confirmed that the factory did not require any employee deposits or have any payment withholding practices.

2.22a. Is there any prison labor used in this facility?

No

Based on the employees' interviews and on our detailed factory inspection, we confirmed that there is no prison labor used in this factory.

2.22b. Does the facility subcontract production out to prison?

No

Based on the workers' interviews and on our detailed factory inspection, we confirmed that there is no prison labor used in this factory.

2.23a. Do workers understand the terms of their employment?

Yes

Through the workers' interviews, we confirmed that all the workers understood the terms of their employment.

2.23b. Are all work contracts in the language(s) understood by workers and signed by both parties (employer and workers)? For countries with at-will employment and/or no formal contracts, include a statement to that effect.

Yes

During the documentation review process, we checked the employment contracts of 30 workers. Each contract had been signed both by the worker in question and by the factory, and all contracts appeared to be genuine. We found

no irregularities, nor anything to arouse suspicion.

2.23c. Do contract provisions meet legal requirements and include all necessary information in a transparent and accurate manner? This includes, but is not limited to, wages, hours of work, days off, annual leave, disciplinary procedures that can result in termination, and, if relevant, dormitory terms and conditions.

Yes

Through a review of the 30 sampled workers' contracts, we verified that the contract provisions meet the legal requirements and include all necessary information in a transparent and accurate manner.

2.23d. Are copies of contracts provided to workers and kept in personnel files?

Yes

Through 30 sampled employees' interviews, we confirmed that the factory had provided the copies of contracts to employees. And all of the 30 sampled workers' contracts kept in personnel files were provided by the factory for auditor' review.

2.23e. Is there evidence that the facility has a practice of replacing or changing original contract terms to terms less favorable for the worker without the worker's knowledge and/or consent (i.e., contract substitution and supplemental agreements)?

No

Through the workers' interviews, we confirmed that there was not any evidence that the factory had a practice of replacing or changing original contract terms to terms less favorable for the worker without the worker's knowledge and/or consent (i.e. contract substitution and supplemental agreements).

Quality Plan ([Principle 03: Prohibition of Child Labor](#))

Audit Questions and Objective Evidence/Comments

Principle 3: Prohibition of Child Labor

Facilities will not hire any employee under the age of 15 (14 in less-developed countries) or under the minimum age established by law for employment, whichever is greater, or any employee whose employment would interfere with compulsory schooling.

Facilities will ensure they do not engage in any form of child labor, including, but not limited to, the internationally

Completed

recognized worst forms of child labor. Consistent with ILO Convention 138, facilities may not employ any person at an age younger than the law of the jurisdiction allows and in any case not below the age of 15 (14 in less-developed countries), even if permitted by local law. In addition, facilities will adhere to local legal requirements regarding mandatory schooling. Further, if, where permitted by local law, a facility employs young workers (defined as workers whose age is between the minimum age of employment and 18 years), the facility will also comply with any applicable legal restrictions on the nature and volume of work performed by such young workers, as well as any other requirements imposed by law, including limitations related to working hours and to ensuring that such young workers do not perform any hazardous work (e.g., chemical handling or operating heavy machinery).

3.1. Does the facility maintain a written procedure to avoid employing child labor?

Yes

Through the documentary review, we confirmed that the factory has maintained a written procedure to avoid employing child labor, which stipulated HR staff interviewed each potential employee, and then obtained his or her ID card to review these materials for authenticity before hiring. The policies and procedures # Sahinler SOP; last reviewed on November 5, 2024.

3.2. Are policies and procedures regarding child labor effectively communicated to all workers?

Yes

Through the documentary review and workers' interviews, we confirmed that the factory has conducted training on policies and procedures regarding child labor for all employees.

3.3a. Do the programs and materials used to train relevant individuals on the child labor policies and procedures, including all individuals responsible for the hiring process, cover the requirements to obtain appropriate age documentation?

Yes

Through the documentary review and workers' interviews, we confirmed that appropriate programs and materials are used to train relevant individuals, including all individuals responsible for the hiring process, on the factory's child labor practices (to cover requirements to obtain age documentation, review age documentation for authenticity, and interview all prospective workers), and the materials for training were found to be appropriate and well maintained.

3.3b. Do the programs and materials used to train relevant individuals on the child labor policies and procedures, including all individuals responsible for the hiring process, cover the requirements to review age documentation for authenticity?

Yes

Based on the documentary review, we ascertained that the facility has a program and materials to train all relevant individuals, especially those responsible for the hiring process, on its child labor practices. The process covered the requirement to review age documentation for authenticity.

3.3c. Do the programs and materials used to train relevant individuals on the child labor policies and procedures, including all individuals responsible for the hiring process, cover the requirements to interview ALL prospective workers?

Yes

WRAP - Audit Report

Based on the documentary review, we ascertained that the facility has a program and materials to train all relevant individuals, especially those responsible for the hiring process, on its child labor practices. The process covered the requirement to interview ALL prospective workers.

3.4. Does the facility explicitly prohibit all forms of child labor?

Yes

Through the documentary review and workers' interviews, we confirmed that the factory explicitly prohibits all forms of child labor.

3.5a. Does the facility obtain proof of age documentation from potential workers and review the documentation for authenticity prior to hiring through an interview process (interview checklist maintained)?

Yes

The factory ascertains the stated age of each applicant through the interview process by asking each prospective employee to show his or her ID card for verification.

3.5b. Does the facility obtain proof of age documentation from potential workers and review the documentation for authenticity prior to hiring by comparing photo on age document with physical appearance of person?

Yes

Through the documentary review and workers' interviews, we confirmed that the factory compared photos on age documents with the physical appearance of the person during the process of recruiting new employees to avoid recruiting child labor.

3.5c. Does the facility obtain proof of age documentation from potential workers and review the documentation for authenticity prior to hiring through worker's completed and signed employment application?

Yes

During the document checking process, the factory checked the workers' completed and signed employment applications to ensure that no child labor is hired.

3.5d. Does the facility obtain proof of age documentation from potential workers and review the documentation for authenticity prior to hiring through other methods (Please list)? Apply extra diligence in locations where child labor is common.

Yes

To obtain his or her ID card and school certificates and to review these materials for authenticity before hiring.

3.6. Does the facility retain proof of age documentation for each worker and maintain the information in the worker's personnel file for the length of time as required by law?

Yes

Through a check of the workers' Employee Personnel Files we confirmed that each file includes a copy of that worker's ID card as proof of age and the information regarding how long the employee has been working at the factory.

3.7. Is there any evidence that suggests child labor is being utilized at the facility? (If a reasonable suspicion exists that there are age-borderline workers, be extremely cautious and attentive to assessing this compliance. If you suspect the age of any individual(s) you observe in the facility, you

No

MUST seek to include them in the review process for age authentication, including worker interview.)

All employees in the factory appear to be above the minimum age of 18. No child workers were noted during the walkthrough or during the workers' interviews.

3.8a. If young workers (legal minimum working age up to 18 years old) are employed, does the facility ensure that it has written policies and procedures related to recruitment and employment practices of young workers?

Yes

Through the documentary review, we confirmed that the factory has established written policies and procedures related to recruitment and employment practices of young workers. No young workers in the factory.

3.8b. If young workers (legal minimum working age up to 18 years old) are employed, does the facility ensure that it has policies to safeguard young workers, including, but not limited to, ensuring young workers having access to the facility's grievance mechanism?

Yes

The factory's written policies and procedures stipulated that young workers have access to the facility's grievance mechanism. No young workers in the factory.

3.8c. If young workers (legal minimum working age up to 18 years old) are employed, does the facility ensure that worker's assigned tasks are appropriate for their age, including, but not limited to, operating of heavy machinery, hazardous work environment, etc.?

Yes

The factory's written policies and procedures stipulated that the employees' assigned tasks are appropriate for their age. No young workers in the factory.

3.8d. If young workers (legal minimum working age up to 18 years old) are employed, does the facility ensure that overtime/night work complies with local/national law?

N/A

No young workers in the factory.

3.8e. If young workers (legal minimum working age up to 18 years old) are employed, does the facility ensure that medical check/registration with local bureau (if applicable) are conducted?

N/A

No young workers in the factory.

3.8f. If young workers (legal minimum working age up to 18 years old) are employed, does the facility ensure that it accurately maintains the list of young workers?

N/A

No young workers in the factory.

Quality Plan ([Principle 04: Prohibition of Harassment and Abuse](#))

Audit Questions and Objective Evidence/Comments

Principle 4: Prohibition of Harassment and Abuse

Facilities will provide a work environment free of supervisory or co-worker harassment and abuse, and free of corporal punishment in any form.

Facilities will ensure a workplace that is respectful of a worker's rights and dignity. This includes ensuring that no corporal punishment or physical coercion be used. Facilities will not engage in or tolerate – either at the workplace or in residential quarters provided by facilities or labor brokers acting on their behalf – any sexual harassment or abuse, indecent or threatening gestures, abusive tone or language or any other kind of undesired physical or verbal contact, such as bullying. In particular, facilities will ensure proper training at all levels - including management, supervisors and workers - to secure a workplace free of harassment and abuse.

4.1a. Does the facility maintain a written procedure on the prohibition of harassment, abuse, and corporal punishment?

Yes

Based on the document review process and employees' interviews, we confirmed that the factory has set up written policies and procedures to effectively prohibit all forms of harassment, abuse, and corporal punishment. The policies and procedures # Sahinler SOP; last reviewed on November 5, 2024.

4.1b. Are the definition(s) of the non-compliant behavior(s) and management policy(ies) consistent with the intent to prohibit all forms of this behavior?

Yes

Based on the document review process and employee interviews, we confirmed that the definition of non compliant behavior and management policy towards them is clearly consistent with the intent to prohibit all forms of this behavior.

4.2a. Does the facility have an effective and mandatory program to train relevant individuals, including all individuals responsible for the supervision of workers, on the facility's policies and procedures prohibiting all forms of harassment, abuse, and corporal punishment?

Yes

There is a program to train relevant individuals on the factory's policies and procedures prohibiting all forms of harassment, abuse, and corporal punishment, and the Meeting Notes for Training are well maintained. During the documentary review we verified that the last updated training on prohibition of verbal and physical abuse was done on December 7, 2024 by Mr. Mohamed Lotfy / HR Manager.

4.2b. Does the facility provide the trainings to its workers on the facility's policies and procedures prohibiting all forms of harassment, abuse, and corporal punishment?	Yes
During the document review process, we confirmed that the factory effectively prohibits all forms of harassment, abuse, and corporal punishment not only through its written policies and procedures but also through oral training.	
4.2c. How often does the training to relevant individuals and workers occur?	The factory provides training once every year.
4.2d. When was the last training conducted?	December 7, 2024.
4.3a. Does the policy include reasonable punitive repercussions for non-compliance and repeated non-compliance? Note: The policy must apply to the behavior of all workers with special emphasis placed upon supervisory personnel.	Yes
Through the documentary review, we verified that the policy includes reasonable punitive repercussions for non compliance and repeated non-compliance, and it applies to the behavior of all employees with special emphasis placed upon supervisory personnel.	
4.3b. Are the punitive repercussions effectively communicated to workers?	Yes
Through the documentary review, we verified that the policy includes reasonable punitive repercussions for non compliance and repeated non-compliance was communicated effectively to workers.	
4.3c. Does the facility keep the records of all disciplinary action?	Yes
Yes, the factory keeps records in the HR office.	
4.4. Has the facility's management signed statements affirming their understanding of the facility's anti-harassment and abuse policies? (Note: If the facility has not required signed statements in the past, evidence of statements signed on a prospective basis, i.e., from a certain date forward, is acceptable.)	Yes
The members of the factory's management team have all signed statements affirming their understanding of the anti-harassment and abuse policies, and these statements are posted on the factory's general bulletin board for all workers to review.	
4.5a. Does the facility communicate the policy on the prohibition of harassment and abuse to workers and third-party services (e.g., security guards, kitchen services)?	Yes
The facility conducted awareness training on December 7, 2024 internally and on December 8, 2024 externally. a.WRAP Principle 4, the Prohibition of Harassment or Abuse, is posted on the factory's general bulletin board, as well as in the factory itself, for all workers to review. b. The factory communicates these requirements in writing to all third-party services that will have significant contact with factory employees.

4.5b. When was the last time of such communication internally and externally?	On December 7, 2024, internally and on December 8, 2024, externally.
---	--

4.6a Does the facility encourage workers to report instances of harassment or abuse, without fear of retribution, through effective communication of facility policies?	Yes
---	-----

The suggestion boxes (3 boxes) for employee complaints hang on near to the toilets and are unlocked and emptied on a weekly basis by Mr. Mohamed Lotfy / HR Manager, who handles employee complaints directly and personally. This constitutes an effective Open-Door Policy by which workers are encouraged to report any type of harassment or abuse. According to Mr. Mohamed Lotfy / HR Manager, up till now the factory has received no reports of this kind.

4.6b. If any incidents of harassment or abuse were reported, were they resolved in a timely manner?	N/A
---	-----

Up to the day of the audit, the factory had received no reports of this kind. In addition, through the workers' interviews, we confirmed that no harassment or abuse had ever previously happened. If any incidents of harassment or abuse were reported, the factory has a documented policy to resolve such incidents and would do so in a timely manner according to its policy.

4.6c. Describe the process.	When incidents of harassment or abuse happen, the employees can respond to the management directly through the suggestion boxes or workers' representative; the factory management will immediately investigate and verify the relevant situation, and then deal with the incidents.
-----------------------------	--

4.7a. While inspecting the plant, were any signs noted of physical abuse (including but not limited to shared physical characteristics evident in many workers), such as: Bruising?	No
---	----

During the audit, we did not find any signs of physical abuse, such as bruising.

4.7b. While inspecting the plant, were any signs noted of physical abuse (including but not limited to shared physical characteristics evident in many workers), such as: Obvious physical injuries (casts, or other corrective wraps, an exaggerated repetition of the same medical condition)?	No
--	----

During the audit, we did not find any signs of obvious physical injuries.

4.7c. While inspecting the plant, were any signs noted of physical abuse (including but not limited to shared physical characteristics evident in many workers), such as: Isolated workers?	No
---	----

During the audit, we did not find any signs of isolated workers.

4.7d. While inspecting the plant, were any signs noted of physical abuse (including but not limited to shared physical characteristics evident in many workers), such as: Overt sights of corporal or psychological punishment?

No

During the audit, we did not find any signs of corporal or psychological punishment.

4.8a. Through interviews with workers, were there any complaints about: Verbal abuse?

No

During the workers' interviews, there were no complaints and we did not find any signs of verbal abuse.

4.8b. Through interviews with workers, were there any complaints about: Sexual harassment?

No

During the workers' interviews, there were no complaints and we did not find any signs of sexual harassment.

4.8c. Through interviews with workers, were there any complaints about: Threatening gestures?

No

During the workers' interviews, there were no complaints and we did not find any signs of threatening gestures.

4.8d. Through interviews with workers, were there any complaints about: Monetary deduction discipline?

No

During the workers' interviews, there were no complaints and we did not find any signs of monetary deduction discipline.

4.8e. Through interviews with workers, were there any complaints about: Bullying?

No

During the workers' interviews, there were no complaints and we did not find any signs of bullying.

4.8f. Through interviews with workers, were there any complaints about: Intimidation?

No

During the workers' interviews, there were no complaints and we did not find any signs of intimidation.

4.8g. Through interviews with workers, were there any other complaints?

No

During the workers' interviews, there were no complaints and we did not find any other abusive behavior.

Quality Plan (Principle 05: Compensation and Benefits) 

Audit Questions and Objective Evidence/Comments

Principle 5: Compensation and Benefits

Facilities will pay at least the minimum total compensation required by local law, including all mandated wages, allowances and benefits.

Facilities will ensure proper compensation for their employees for all the work done, by providing in a timely manner all the wages and benefits that are in compliance with the local and national laws of the jurisdiction in which they are located. This will include any premiums for overtime work or work done during holidays, as well as any other allowances or benefits, including any mandatory social insurance, required by local law.

5.1a. Does the facility maintain a compensation and benefits policy that includes all of the following: A detailed description of the workers' compensation and benefits at the time of employment?

Yes

Policy Name: The Compensation and Benefits Management Procedure Policy # Sahinler SOP; last reviewed on November 5, 2024. The factory provided us the written compensation and benefits procedure during the audit, including the following contents: a detailed description of the employees compensation and benefits at the time of employment, both written and verbal explanations of wage calculations provided at the time of employment, a requirement that changes relating to compensation rates or methods of wage calculations shall be communicated timely and effectively, and all compensation and benefits at least meet the local requirements.

5.1b. Does the facility maintain a compensation and benefits policy that includes all of the following: Both written and verbal explanations of wage calculations provided at the time of employment?

Yes

Through interviews with employees, we confirmed that both written and verbal explanations of wage calculations are provided at the time of employment.

5.1c. Does the facility maintain a compensation and benefits policy that includes all of the following: A requirement that changes relating to compensation rates or methods of wage calculations shall be communicated timely and effectively?

Yes

Through the onsite tour and employees' interviews, we noted that the facility has posted the Compensation and Benefits Policy and changes relating to compensation rates or methods of wage calculations on the general bulletin board for workers' review.

5.1d. Does the facility maintain a compensation and benefits policy that includes all of the following: All compensation and benefits at least meet the local requirements?

Yes

We verified that the facility maintains a compensation and benefits policy that includes all compensation and benefits at least meet the local requirements.

5.2a. Does the facility compensate workers consistently with their terms of employment and in accordance with local/national laws and regulations related to minimum wage?	Yes
We verified that the factory compensates employees consistently with their terms of employment and in accordance with local/national laws and regulations related to Minimum wage on time wage payments, overtime premium, on time payment for resignation/ termination / dismissal / severance, and benefits, including but not limited to, entitled leave, maternity leave, etc.	
5.2b. Does the facility compensate workers consistently with their terms of employment and in accordance with local/national laws and regulations related to on time wage payments?	Yes
We verified that the factory compensates employees consistently with their terms of employment and in accordance with local/national laws and regulations related to on time wage payments.	
5.2c. Does the facility compensate workers consistently with their terms of employment and in accordance with local/national laws and regulations related to overtime premium?	Yes
We verified that the factory compensates employees consistently with their terms of employment and in accordance with local/national laws and regulations related to overtime premium.	
5.2d. Does the facility compensate workers consistently with their terms of employment and in accordance with local/national laws and regulations related to on time payment for resignation/ termination/dismissal/severance?	Yes
We verified that the factory compensates employees consistently with their terms of employment and in accordance with local/national laws and regulations related to on time payment for resignation termination /dismissal /severance.	
5.2e. Does the facility compensate workers consistently with their terms of employment and in accordance with local/national laws and regulations related to benefits, including but not limited to, entitled leave, maternity leave, etc.?	Yes
We verified that the factory compensates employees consistently with their terms of employment and in accordance with local/national laws and regulations related to benefits, including but not limited to, entitled leave, maternity leave, etc.	
5.3. Do the facility's trainee and probation policies comply with the local/national laws?	Yes
Through the documentary review, we confirmed that the factory's trainee and probation policies comply with the local / national laws.	
5.4a. Does the facility meet its obligations on social insurance?	Yes

WRAP - Audit Report

Rec

Audit #: 10915, Factory: Sahinler Egypt - Private Free Zone,
Address Line 1: 1,12,13,14 Block 10 and 6,7 Block 16 3rd Industrial
Zone, City: New Borg Al Arab, Country: Egypt, Approval Status:
Completed

Through our review of the relevant document, it appears that the factory meets their obligations on social insurance.

5.4b. Does the facility cover all eligible workers under social insurance? If No, provide explanations.

Yes

Through the documentary review, we found that the factory has provided all workers and employees with social insurance program and provided a proof of compliance from the local social security administrative bureau to confirm that the factory has met the locally mandated requirements for buying social insurance for its workers.

5.4c. Does the facility make the required payments to the government without delay?

Yes

Through our review of the relevant documents, it appears that all legally mandated withholdings - e.g., taxes, social security, etc. - are remitted to the government properly.

5.5a. Does the facility post legal minimum wage rates, overtime premium rates, benefits policies, social insurance, and additional payment information in the language(s) understood by the facility workers?

Yes

WRAP Principle 5, Compensation and Benefits, is posted on the factory's general bulletin board, as well as on the factory itself. Details of this posting include the legal local minimum wage rate, the overtime wage rate, the statutory holidays wage rate, and the policies regarding benefits, and yes, all postings are in workers' languages.

5.5b. Are workers provided with adequate communication of their legally mandated minimum compensation rights, including overtime premiums?

Yes

There is a program to train both management and workers in the adoption, implementation, and monitoring of all national and local laws, including their legally mandated minimum compensation rights, and the Meeting Notes for Training in this WRAP Principle, as well as all relevant updated documents, are well maintained.

5.6a. Does the facility produce and retain payroll records to support compensation, including overtime and benefits?

Yes

During this audit, we ascertained that the factory has produced and retained payroll records to support compensation, including overtime and benefits, and that it has stored these payroll records and relevant documents for no less than the two years required by law.

5.6b. Does the facility keep such records for such time as required by local/national laws? Please state the record retention time required by local/national laws.

Yes

We verified that the factory has maintained these payroll records and relevant documents for no less than the two years required by law.

5.6c. In the case the facility pays its workers through wire transfers, does the facility produce and retain proof of bank statements showing all the transactions in a verifiable way? (Note: The name of the worker, salary amount, and the date of the transaction must appear on the bank slip showing the transaction, as well as the recipient's bank name and account.)

Yes

Audit #: 10915, Factory: Sahinler Egypt - Private Free Zone,
Address Line 1: 1,12,13,14 Block 10 and 6,7 Block 16 3rd Industrial
Zone, City: New Borg Al Arab, Country: Egypt, Approval Status:
Completed

The factory pays all of its employees in bank transfer on a monthly basis. Through the documentary review we confirmed that the factory produces and retain proof of pay slip showing all the salaries details in a verifiable way.

5.7a. Does the facility provide all workers with a pay record or stub that lists the components of the wages paid, including all deductions?

Yes

Through careful check of the workers' payroll records and the employee interviews, we confirmed that this factory provides detailed pay stubs to its workers, showing clearly every component in the calculation of their pay.

5.7b. Do all workers sign off on wage pay records/stub, including when done by direct transfer into the worker's bank account?

Yes

Through the documentary review, we confirmed that all employees signed off on wage pay records / stubs.

5.7c. List all deductions show on workers' paystub.

Social security insurance, income taxes, loans and absent fees are shown on the workers' paystub.

5.8a. Are there any piece rate workers in the facility? If so, review a sampling of the documentation for piece rate workers as compared to wage rate workers to ensure compliance with this Principle.

No

The factory calculates workers' pay on monthly rates, and there are no piece-rate workers in this factory.

5.8b. Does the facility have a written and coherent policy on piece rate compensation, including overtime premium rates?

N/A

There are no piece-rate workers in this factory.

5.8c. Does the piece rate compensation at least satisfy the minimum compensation prescribed by law?

N/A

There are no piece-rate workers in this factory.

5.8d. Do workers sign off on material counts for piece rate systems?

N/A

There are no piece-rate workers in this factory.

5.9a. Does the facility have a daily/weekly/ monthly quota for its production workers to meet?

No

During workers' interviews and documents review, we verified that the factory does not have a quota for its workers.

5.9b. What percentage of workers reach the quota within a regular work shift?

Not applicable. There was no quota for its production workers.

5.9c. What happens when the quota is not met?

Not applicable. There was no quota for its production workers.

Quality Plan (Principle 06: Hours of Work)

Audit Questions and Objective Evidence/Comments

Principle 6: Hours of Work

Hours worked each day, and days worked each week and each month, should not exceed the limitations of the country's law. Facilities will provide at least one day off in every seven-day period, except as required to meet urgent business needs.

Facilities are required by local law to adhere to any limits set on regular working hours as well as any limits set on overtime work. Long term participation in the WRAP Certification Program is contingent upon meeting the limitations set by local law. WRAP recognizes that this can be a particularly challenging requirement, especially when taking into account local enforcement norms and customs. In light of this reality, WRAP will permit full compliance with local laws on working hours to be achieved incrementally, provided that a given facility meets the following conditions: is fully transparent about its working hours; ensures that those hours are all being worked voluntarily, in conditions that protect worker safety and health; compensates all employees in keeping with WRAP Principle 5; and shows improvement toward meeting the working hours requirements from one audit to the next.

6.1. Does the facility have procedure to ensure compliance with national and local laws?

Yes

Through the documentary review we verified that the factory has a policy and procedure to ensure compliance with national laws and WRAP Principle. Policy Name & No.: # Sahinler SOP; last reviewed on November 5, 2024.

6.2. Does the facility have an effective program and relevant materials to train all individuals, including all individuals responsible for production coordination and scheduling, to ensure that workers work no more than the legal maximum hours, including overtime ceilings?

Yes

During the documentation review, we found that the factory has a program and relevant materials to train all individuals, including all individuals responsible for production coordination and scheduling to ensure that the employees work no more than the legal maximum hours, including overtime ceilings.

6.3a. Are all workers made aware, at the time of hiring, of facility policies and procedures that specify the legal limitations on the maximum hours of work per day, week and month, both regular and overtime?	Yes
All employees are made aware, at the time of hiring, of factory policies and procedures, specifically the legal limitations on the maximum hours of work per day, week, and month, both regular and overtime.	
6.3b. Are all workers made aware, at the time of hiring, of facility policies and procedures that specify the legal limitations on the maximum number of consecutive days they can legally be required to work?	Yes
All employees are made aware, at the time of hiring, of factory policies and procedures, specifically the legal limitations on the maximum number of consecutive days they can legally be required to work.	
6.4a. Does the facility retain complete and accurate time records onsite of at least the past 12 months that reflect the days and dates workers worked (if the local requirement is more than 12 months, follow the local one)?	Yes
The factory retains all workers' time records, and during the audit, we reviewed a selection of these records (including the days and dates employees worked and the number of hours worked each day) and found that they appear to be genuine and are sufficiently detailed to be convincing.	
6.4b. Does the facility retain complete and accurate time records onsite of at least the past 12 months that reflect the number of hours worked each day (if the local requirement is more than 12 months, follow the local one)?	Yes
Based on the documentary review, we confirmed that the number of hours worked each day was indicated on the time records that the factory retains complete and accurate onsite for the past 12 months.	
6.5a. Does a crosscheck of other facility records, such as production records and CCTV (if applicable), show any 7th day work?	No
Through a crosscheck of other factory records, we confirmed that these records showed no any 7th day work.	
6.5b. Does a crosscheck of other facility records, such as production records and CCTV (if applicable), show inconsistencies with time records?	No
Through a crosscheck of other factory records, we confirmed that these records were consistent with time records.	
6.6a. Are daily overtime hours worked in compliance with local/national laws? Check any that applies. If there are excessive overtime hours, state the total number of hours including overtime.	Yes
Workers' daily overtime hours are within 2 hours, which is in line with legal requirements.	
6.6b. Are weekly overtime hours worked in compliance with local/national laws? Check any that applies. If there are excessive overtime hours, state the total number of hours including overtime.	Yes
Workers' weekly overtime hours are within 12 hours, which is in line with legal requirements.	

Audit #: 10915, Factory: Sahinler Egypt - Private Free Zone,
Address Line 1: 1,12,13,14 Block 10 and 6,7 Block 16 3rd Industrial
Zone, City: New Borg Al Arab, Country: Egypt, Approval Status:
Completed

6.6c. Are monthly overtime hours worked in compliance with local/national laws? Check any that applies. If there are excessive overtime hours, state the total number of hours including overtime.	Yes
Workers' monthly overtime hours are within 48 hours, which is in line with legal requirements.	
6.6d. Are quarterly overtime hours worked in compliance with local/national laws? Check any that applies. If there are excessive overtime hours, state the total number of hours including overtime.	N/A
There is no limit on quarterly overtime hours in local law.	
6.6e. Are yearly overtime hours worked in compliance with local/national laws? Check any that applies. If there are excessive overtime hours, state the total number of hours including overtime.	N/A
There is no limit on yearly overtime hours in local law.	
6.7a. Does the facility have a written, rational, and well-communicated policy defining 'urgent business needs'? Note: The definition of 'urgent business needs' cannot be vague or open-ended. It must be limited to delays/interruptions in production caused by natural calamities, non-repetitive production deadlines or unforeseen circumstances beyond the facility's control. A coherent and consistent rationale must be evident in the definition and infrequent deployment of 'urgent business needs'.	Yes
Factory's definition of urgent business needs: The factory has defined the urgent business needs in written policy to address and define all the urgent business situations such as: 1-Heavy rains 2-Strikes 3-Road blocked 4-High absence rates 5-Shortage of materials 6-Electrical power off 7-Pandemics	
6.7b. Were there occurrence(s) of urgent business needs in the past 12 months? If Yes, list the number of instances and the occasions occurred: E.g., November 4 - 12, 2020	No
No cases of urgent business needs in the past 12 months.	
6.7c. If yes to 6.7b, does the facility provide one day off after 13 consecutive working days, if applicable?	N/A
No cases of urgent business needs in the past 12 months.	
6.7d. If yes to 6.7b, list: department(s) & # of workers involved in each department and provide reasons for such occurrence(s):	N/A.

6.8a. Other than cases of "urgent business needs", do workers get at least one day off after six consecutive working days?

Yes

Through a detailed check of the attendance records, we confirmed that other than cases of "urgent business needs", workers get at least one day off after six consecutive working days.

6.8b. If no to 6.8a, in the past 12 months, how many instances occurred where workers worked more than 6 consecutive days? List the number of instances and the occasions occurred: E.g., one time, November 4 - 12, 2020

N/A.

6.8c. If no to 6.8a, list department(s) & # of workers involved and reasons for such occurrence(s):

N/A.

6.9 Are notifications of maximum regular and overtime hour policies visibly posted in the language(s) understood by the facility's workers and management personnel?

Yes

All information regarding maximum regular and overtime hour policies is posted in all workers' languages on the general bulletin board, as well as in the factory itself, for the workers and management personnel to review, and so far, as we could ascertain, all employees appear to be well informed about these policies.

Noncompliances Raised Against This Principle

Were any noncompliances or observations raised against this Principle? If yes, note whether they are Major, Minor, or Observations:

No

Nil.

Quality Plan (Principle 07: Prohibition of Discrimination) 

Audit Questions and Objective Evidence/Comments

Principle 7: Prohibition of Discrimination

Facilities will employ, pay, promote, and terminate workers on the basis of their ability to do the job, rather than on the basis of personal characteristics or beliefs.

Facilities will ensure that all terms and conditions of employment are based on an individual's ability to do the job, and not on the basis of any personal characteristics or beliefs. Facilities will ensure that any employment decision – involving hiring, firing, assigning work, paying or promoting – is made without discriminating against the employees on the basis of race, color, national origin, gender, age, sexual orientation, religion, disability, or other similar factors (pregnancy, political opinion or affiliation, social status, etc.).

7.1. Does the facility have procedures and practices to ensure compliance and remediation with the facility policy?

Yes

WRAP - Audit Report

Rec

Audit #: 10915, Factory: Sahinler Egypt - Private Free Zone,
Address Line 1: 1,12,13,14 Block 10 and 6,7 Block 16 3rd Industrial
Zone, City: New Borg Al Arab, Country: Egypt, Approval Status:
Completed

The factory has a written policy that explicitly prohibits discrimination, and this policy is posted on the factory's general bulletin board, as well as in the factory itself, for all workers to review.

7.2. Are the facility's written policy, practices and procedures on discriminatory behavior effectively communicated to and understood by all workers and management personnel?

Yes

At the time of hiring, the factory management effectively communicates to all new employees the factory's policy, practices, and procedures on discriminatory behavior. Furthermore, the factory's Employee Handbook, in which the facility's relevant policy, practices, and procedures are included, is visibly posted on the general bulletin at main gates and production sections entry areas for all workers and staff to review.

7.3. Does the facility have an effective program and materials used to train relevant individuals, including all individuals responsible for the supervision of workers and the hiring process, on the facility's policy and procedures prohibiting discrimination?

Yes

Through a review of factory documents and related records, we ascertained that the entire management team, not just that portion of it referred to under 7.3, has been trained to follow up on this Principle of Non-Discrimination.

7.4. Does the facility effectively communicate the requirements of this Principle to third parties (subcontractors, labor brokers/ agencies, industrial parks, export processing zones, free trade zones, etc.) that may recruit and screen applicants on its behalf in writing?

Yes

The factory effectively communicates in writing the requirements of this Principle to third parties (industrial parks, export processing zones, free trade zones, labor office, etc.) that may recruit and screen applicants on its behalf.

7.5. Has the facility had any discrimination charges filed against it by workers, regulatory agencies or any outside agency during the past two years? If so, please provide details.

No

During the past two years, no discrimination charges have been filed against the factory by employees, regulatory agencies or any outside agency.

7.6. Does the facility explicitly prohibit mandatory pregnancy testing as a condition of employment or continued employment?

Yes

Both in the factory's written Employment Procedures and its Employee Handbook, the prohibition of pregnancy testing as a condition of employment or continued employment is explicitly stipulated.

7.7. Are workers with the same job and seniority paid the same rate, irrespective of race, color, national origin, gender, age, sexual orientation, religion, disability, or other characteristics?

Yes

Based on the document review and the worker interviews we confirmed that workers with the same job and seniority are paid at the same rate, irrespective of gender, age, or other characteristics.

7.8. Do all workers have an equal opportunity to work overtime?

Yes

WRAP - Audit Report

Completed

Through the program document review and the management statement, we confirmed that all workers in the factory have an equal opportunity to work overtime.

7.9. Do all workers sign statements (statements may be included in an employment application or contract), written in the language(s) understood by workers, affirming their receipt and understanding of the facility's anti-discrimination policies and procedures?

Yes

Through a check of the workers' personnel files (30), we verified that all employees have signed statements in workers' language, affirming their receipt and understanding of the factory's anti-discrimination practices.

7.10. Are pregnant women engaged in work that creates a risk for their pregnancy or reproductive health?

No

Through interviews with workers and the documents review, we confirmed that pregnant women are assigned jobs and work hours suitable for their physical condition, as per the requirements of the country's Standards for pregnant women. The factory has no pregnant women at the audit time.

7.11a. Does the facility have written policies and procedures related to termination and layoff?

Yes

Written policies and procedures related to termination and layoff are established in local language and posted publicly in the factory.

7.11b. Do these policies and procedures comply with local/national laws?

Yes

We verified that these written policies and procedures fully comply with local / national laws.

7.11c. Does the facility provide training to all workers on termination and layoff policies and procedures, particularly to newly hired workers?

Yes

Through interviews with workers, we confirmed that the factory provides training for all employees on termination and layoff policies and procedures, particularly for newly hired employees.

7.12. Can workers terminate employment by giving proper notice (defined by local laws or by contract terms) at any time and without penalty?

Yes

Through the documentary review, we confirmed that workers can terminate employment by giving proper notice (defined by local laws or by contract terms) at any time and without penalty.

Quality Plan (Principle 08: Health and Safety) 

Health and Safety Overview

Principle 8: Health and Safety

Facilities will provide a safe and healthy work environment. Where residential housing is provided for workers, either directly by facilities or through labor brokers, facilities will ensure it is safe and healthy housing.

Facilities will provide a safe, clean, healthy and productive workplace for their employees. Facilities shall prioritize worker health and safety above all else, and proactively address any safety issues that could arise. This will include a wide variety of requirements, such as, ensuring, among other things, the availability of clean drinking water (at no charge to workers), adequate medical resources, emergency exits and safety equipment, well-lit and comfortable workstations, and clean restrooms. Further, facilities shall adequately train all their workers on how to perform their jobs safely.

8.1. Does the facility comply with all relevant health and safety laws and regulations, including any directives related to public health issued by relevant local authorities?

Yes

The factory routinely conducts revisions to existing laws and regulations. The factory has written health and safety policies and procedures # Sahinler SOP; last reviewed on November 5, 2024.

8.2. Has facility management deployed an adequate plan to address public health issues in the facility

Yes

During the documentary review, we confirmed that the factory has an adequate plan which addresses public health issues in the factory.

8.3. Does the facility undertake internal monitoring of its health and safety systems, including fire safety, to ensure it is following written procedures/processes and meeting the requirements of all relevant laws? Please describe the nature of the internal monitoring procedures, including frequency and coverage

Yes

The factory conducts regular and routine internal monitoring of its systems to check all health, safety and fire safety issues inside the factory. The factory conducts H&S and fire safety internal monitoring every 6 months; the last one was done on February 15, 2025 by Mr. Mostafa Mahmoud / HSE Officer.

8.4a. Have risk assessments been carried out throughout the facility, including fire risk assessments?

Yes

WRAP - Audit Report

During the documents review and management interview, we verified that the H&S risk assessment which was conducted on January 1, 2025 did not cover risks related to nursing mothers.

Desktop review on March 13th of 2025

On March 13th of 2025, the factory sent us for our review, the photographic evidence of its resolution of this issue, evidence confirming that the factory has now updated the H&S risk assessment on March 12, 2025 and has added the risks related to nursing mothers.

8.4b. How often does the facility perform risk assessments?

During the documentary review, we confirmed that the factory conducts on an annual basis and updates it if any new production operations entered the scope of production.

8.4c. Were the findings communicated with management and health & safety committee?

Yes

Yes, it is communicated through the management review meeting and discussed through the H&S committee monthly meeting. But there are no findings found in the risk assessment.

8.4d. Were actions taken to correct the findings? (Note: If a facility had findings from risk assessments but has since corrected them, no NC should be raised.) Please describe the actions taken and resulting improvement/correction.

Yes

The factory uses corrective action plan method to solve any related issue noted under the risk assessment process and there are no findings found.

8.5. Does the responsible person(s) work with health & safety committee to address findings from the facility's internal monitoring and risk assessments?

Yes

Mr. Mostafa Mahmoud / HSE Officer is a member in H&S committee already and he works to address findings from the factory's internal monitoring and risk assessments.

8.6a. Is a regular occupational health check arranged for workers involved in hazardous job duties, if any?

Yes

The regular medical check was done on January 1, 2025 for all sections by Public Medical Insurance Sector / West Delta branch - Health sector.

8.6b. Is the regular occupational health check free for the applicable workers?

Yes

The regular occupational health checks are free for all workers and are paid by the factory.

8.7. Has the facility properly tracked health, safety, and fire incidents in the past 12 months?

Yes

WRAP - Audit Report

Rec

Audit #: 10915, Factory: Sahinler Egypt - Private Free Zone,
Address Line 1: 1,12,13,14 Block 10 and 6,7 Block 16 3rd Industrial

Through a check of the written records of all accidents and work-related injuries, clinic records, we confirmed that the factory indeed properly tracks health and safety incidents in the past 12 months. The injuries and accidents records are updated every month. The last report was sent to West Delta OHSE office on December 31, 2024.

8.8. Does the facility have an effective program and materials to train relevant individuals, including all individuals responsible for the supervision of workers, on all of the relevant occupational health and safety issues?

Yes

The factory uses OSHA policies and practices / clients' code of conduct as training materials for workers' awareness sessions.

8.9. Does the facility have a written safety program, including written emergency procedures to handle natural disasters, fire safety, and emergencies and industrial accidents?

Yes

The factory has written an emergency response plan which addresses natural disasters, fire safety, emergency, and industrial accidents. It was done on February 1, 2025 by Civil Defense Forces / Alexandria and it will be reviewed in February 2026.

8.10a. Are health and safety reports maintained by the facility?

Yes

We ascertained that health and safety reports are indeed maintained by the factory.

8.10b. Are heavy machinery inspection (boilers, compressors, etc.) documents maintained by the facility?

Yes

We confirm that the factory has heavy machinery maintenance records such as compressors and all production related machineries.

8.10c. Are maintenance reports maintained by the facility?

Yes

Yes, maintenance reports were available with the Maintenance Manager (Mr. Abdel Wanes Farag).

8.10d. Are fire extinguisher records, noting the date of inspection and expiration, maintained by the facility?

Yes

The factory conducts internal inspection for fire extinguishers which is done by Mr. Mostafa Mahmoud / HSE Officer, and externally by Civic Company; the contract was issued on January 1, 2024 and it's automatically renewed and the last check was done on February 1, 2025 and will be expired on February 1, 2026.

8.10e. Are emergency evacuation drill records (at least semi-annual, roughly six months apart) for all shifts, including night shift, and childcare, noting the date and detailed results, maintained by the facility? List at least three (3) emergency evacuation drill dates, two (2) in the past and one (1) planned for every shift, if applicable. List the time it took for all personnel to evacuate.

Yes

The factory conducts the fire drill on a regular basis as the latest two fire drills were on September 30, 2024 (evacuation time was 2 minutes and 40 seconds) and on November 25, 2024 (evacuation time was 2 minutes and 50 seconds). The emergency evacuation drill records are maintained by the facility.

All workers participated in the fire drill with the notation that the drill was successful. As advised by the factory, the next planned fire drill will be done in the fourth week of February 2025.

8.10f. Are work injury reports maintained by the facility?

Yes

The last recorded injuries and accidents record was done on for the past 6 months. The last injury was on December 31, 2024 by West Delta OHSE office.

8.10g. Are clinic logs, noting date and reason for visit, maintained by the facility?

Yes

During the factory walkthrough, it was verified that the clinic logs were available in the clinic room and are updated on a daily basis with all details including visit reason and name.

8.11. Have any government agencies inspected the facility for compliance with safety and health regulations during the past two years? If yes, please list the findings.

Yes

The Civil Defense Forces / Alexandria inspected the factory on February 11, 2025 and no findings were levied against the factory.

8.12a. Does the facility address the following occupational health and safety needs required by the relevant laws and regulations for heat stress/extreme temperatures?

Yes

Based on the factory walkthrough, it was noted that the temperature inside the factory was at acceptable levels. The factory has conducted environmental measurements to make sure that all measurements are in compliance with the legal requirements, and the last measurement report was on September 1, 2024 by Comibassal Co.

8.12b. Does the facility address the following occupational health and safety needs required by the relevant laws and regulations for paint spray/spot cleaning booths?

Yes

The factory has spot cleaning station and the workers were wearing proper and sufficient PPEs during the factory walkthrough.

8.12c. Does the facility address the following occupational health and safety needs required by the relevant laws and regulations for welding safety?

N/A

N/A, no welding processes done inside the factory.

8.12d. Does the facility address the following occupational health and safety needs required by the relevant laws and regulations for respiratory safety?

Yes

Based on onsite observation, the workers who deal with chemicals wear proper protective masks.

8.12e. Does the facility address the following occupational health and safety needs required by the relevant laws and regulations for a bloodborne pathogen program?

Yes

WRAP - Audit Report

Rec

Audit #: 10915, Factory: Sahinler Egypt - Private Free Zone,

Completed

Blood borne pathogen program had been provided for audit.

8.12f. Does the facility address the following occupational health and safety needs required by the relevant laws and regulations for hearing/noise control?

Yes

During the documentary review, it was verified that the noise levels were measured and it was within the legal limits in all the factory sections and floors.

8.12g. Does the facility address the following occupational health and safety needs required by the relevant laws and regulations for indoor air quality?

Yes

Air quality was checked during the environmental measurements report on September 1, 2024 by Comibassal Co. and it was in compliance with the relevant laws and regulations for indoor air quality.

8.12h. Does the facility address the following occupational health and safety needs required by the relevant laws and regulations for cotton dust ventilation?

Yes

The assessment reports on the cotton dust ventilation had been provided for audit and it was acceptable.

8.12i. Does the facility address the following occupational health and safety needs required by the relevant laws and regulations for workplace illumination?

Yes

The illumination of the workplace was measured during the environmental measurements report on September 1, 2024 by Comibassal Co., and it was acceptable.

8.12j. Does the facility address the following occupational health and safety needs required by the relevant laws and regulations for sanitary waste disposal?

Yes

The factory has well organized wastes area which are disposed of and collected by Sphinx Co. The contract was issued on October 1, 2024 and it's automatically renewed and the last consignment was on January 22, 2025.

General Building Requirements

8.13. Does a visual inspection of the facility's building(s) suggest any potential concerns about physical integrity?

No

The factory buildings were in good condition and no concerns about the building integrity were noted during the audit process. No cracks or any building structure issues were noted during the factory walkthrough.

The factory has a building safety check report # 51/86 which was done by Engineering consultant (Eng. Mohamed Khames Zaki) on January 1, 2025; clarifies that the buildings are in good and safe condition.

Also, the factory has an electrical safety check report # 27/7239 which was done by Eng. Asharf Ezzat Mohamed on January 1, 2025.

8.14. Are there any cracks on any of the building structures observed during the audit? If so, please include photos in the PHOTOS section.

No

There are no cracks on the building structures observed during the audit.

8.15. What is the overall general appearance of this facility? Please explain your assessment designation.

Good

It was determined during the factory walkthrough that the factory floors, sections, and buildings were in good looking order and condition.

8.16. Is the overall general appearance of the maintenance shop acceptable and not in a condition that could cause serious injury or harm?

Yes

The maintenance workshop was in good condition and good looking order and there were no concerns about H&S.

8.17. Is trash properly disposed of both inside and outside the facility?

Yes

Trash is properly disposed of from inside and outside the factory premises.

8.18a. Are the toilets and washrooms in the facility in sanitary and serviceable condition?

Yes

The toilets and washrooms are in good and sanitary condition.

8.18b. Are the toilets and washrooms in the facility meeting minimum quantity required by law?

Yes

The factory has a total of 49 (27 males – 22 females) toilets which are sufficient for all workers.

8.18c. Are the toilets and washrooms in the facility stocked adequately with soap and toilet paper?

Yes

Toilets were adequately stocked with soap and toilet paper.

8.19. Are emergency exits unlocked during times when the facility is occupied to allow free, unobstructed exit from the facility?

Yes

During the factory walkthrough, it was verified that the emergency exits were unlocked and unblocked.

8.20. During the facility visit, were any aisles blocked or restricting easy access to emergency exits?

No

The emergency exit aisles were not blocked and were easy access to emergency exits.

8.21a. Has the facility appropriately identified areas that, for fire safety purposes, should be designated as “non-smoking”?

Yes

The factory restricts smoking on all factory floors and sections, and smoking is allowed in the smoking area.

WRAP - Audit Report

8.21b. Is the facility properly enforcing the "non-smoking" policy for areas so designated?	Yes
The factory has written smoking policies and procedures which are shared with workers through announcement boards and refresher courses.	
8.22a. Does the facility maintain first aid supplies as required by law or if no legal requirement exists, as recommended by a local medical provider or relevant authority?	Yes
The factory has first-aid boxes spread all over the factory floors and sections which are fully provided with medicine supplies. The factory has 13 first aid boxes all over the buildings and available during all shifts.	
8.22b. Are these first aid supplies available and accessible to all areas of the facility?	Yes
Through the onsite tour, we found that all the first-aid boxes were provided with medical supplies.	
8.23. Is there clean and free drinking water that is easily accessible to all workers at the facility? List potability test report numbers, if applicable. If not, describe how the facility determines the drinking water is suitable for consumption.	Yes
Through workers interview and management interview, we verified that the factory provides workers with clean and free drinking water. The factory has 2 water coolers spread around the factory floors and in the dining area. The drinking water analysis report # 15/18 was done on September 10, 2024 by Comibassal Co.; the sample was in compliance with the legal approved limits.	
8.24a. Is the facility's crèche/childcare area operated and maintained in a safe and healthy manner?	N/A
The factory does not have an onsite child care facility but they contracted with an outside child care facility (Tint Tots Paradise) which is located in Al Agamy - Alexandria, which is 30 minutes away from the factory; the contract was issued on January 1, 2024 and it's automatically renewed.	
8.24b. Does the location of the crèche/childcare meet the local law requirements?	N/A
The factory does not have an onsite child care facility but they contracted with an outside child care facility (Tint Tots Paradise) which is located in Al Agamy - Alexandria, which is 30 minutes away from the factory; the contract was issued on January 1, 2024 and it's automatically renewed. It has legal permits and is authorized from ministry of social affairs.	
8.25a. Is the facility's canteen/cafeteria operated and maintained in a safe and healthy manner?	N/A
The factory does not provide a canteen or cafeteria. Only a dining area was provided. And it was observed that the provided dining area was clean.	
8.25b. Does the canteen/cafeteria have the required licenses to operate?	N/A

The factory does not provide a canteen or cafeteria. Only a dining area was provided.

8.25c. Does the staff have the required health certificates?

N/A

The factory does not provide a canteen or cafeteria. Only a dining area was provided.

Personal Protection Equipment (PPE)

8.26. Is appropriate PPE provided to affected workers in a timely manner and at no cost?

Yes

During the onsite tour, we found that all affected workers have been provided with the proper PPE in a timely manner and at no cost, PPE such as gloves.

8.27 Is the PPE appropriate and adequate for the workers' job and in good condition?

Yes

During the onsite tour, we found that all the PPE such as gloves were appropriate and adequate for the workers' job and were in good condition.

8.28 Are all workers required to use PPE found using it?

Yes

During the onsite tour, we found that all the workers were wearing the proper PPE, such as gloves, while working.

Electrical Safety

8.29. Is there a qualified electrician in the facility responsible for maintaining electrical safety? If not, what is the facility doing to ensure electrical safety?

Yes

The factory has a qualified electrician who is responsible for all electrical safety in the factory, Mr. Abdel Wanes Farag.

8.30a. Does a visual inspection of the wiring indicate good general condition of cabling?

Yes

Based on our physical inspection of the factory's wiring, we confirmed that all of the wires are neat and in good general condition of cabling.

8.30b. Does a visual inspection of the wiring indicate no exposed or loose wires?

Yes

Based on our physical inspection of the factory, there were no exposed or loose wires.

8.30c. Does a visual inspection of the wiring indicate proper insulation/grounding/earthing?

Yes

Based on our physical inspection of the factory's wiring, we confirmed that all of the wires are neat and in good general condition, with proper insulation / grounding / earthing.

8.31a. Does a visual inspection of the electrical boxes and cabinets verify complete enclosures with covers provided?

Yes

Through a visual inspection of the facility, we found that electrical boxes and cabinets were well-maintained with protective cover to prevent electric shock and warning sign.

8.31b. Does a visual inspection of the electrical boxes and cabinets verify switches and outlets maintained in good working order?

Yes

Through a visual inspection of the facility, we confirmed that switches and outlets were maintained in good condition.

8.31c. Does a visual inspection of the electrical boxes and cabinets verify all knockouts/trips in place?

Yes

Through a visual inspection of the facility, we confirmed that knockouts/trips were in place.

8.31d. Does a visual inspection of the electrical boxes and cabinets verify adequate labeling with safety warning?

Yes

During the onsite tour, we verified that 3 electrical panels in the cutting workshop were not supported with the warning sign.

Desktop review on March 13th of 2025

On March 13th of 2025, the factory sent us for our review, the photographic evidence of its resolution of this issue, evidence confirming that the factory has now posted the warning signs on the electrical panels in the cutting workshop.

8.32a. Does the facility maintain a safety committee comprised of workers and management, which holds regular meetings and keeps minutes of proceedings?

Yes

The factory has H&S committee which consists of 20 members (10 workers and 10 management). The committee formation decree was done on August 19, 2024. This committee has monthly meetings together to discuss about workplace issues and concerns.

8.32b. Does the committee discuss the findings from internal monitoring/risk assessments and find solutions? When was the last time the discussion occurred?

Yes

Yes, the committee discusses the points from the internal monitoring reports. The last two meetings were on December 26, 2024 and January 30, 2025.

8.32c. Does the committee discuss the health, safety, and fire incidents, if any, that happened in the facility and make the necessary preventative changes as needed?

Yes

This committee has monthly meetings together to discuss the health, safety, and fire incidents, if any, that happened in the factory and make the necessary preventative changes as needed.

Audit #: 10915, Factory: Sahinler Egypt - Private Free Zone,
Address Line 1: 1,12,13,14 Block 10 and 6,7 Block 16 3rd Industrial
Zone, City: New Borg Al Arab, Country: Egypt, Approval Status:
Completed

8.33a. Does the facility conduct health & safety and fire safety orientation training for all new workers?	Yes
The new workers are provided with a health & safety and fire safety orientation program which is done externally from July 3~4, 2024 by Egyptian Trade Union Federation and the certificate was valid for 1 year and internally on January 5, 2025 by Mr. Mostafa Mahmoud / HSE Officer.	
8.33b. Do ALL workers have the right to remove themselves from serious imminent danger without seeking permission?	Yes
Yes, this was confirmed during workers interviews and is mentioned in the emergency response plan that all workers have the right to remove themselves from serious imminent danger without seeking permission.	
8.34a. Does the fire safety training cover informing workers of the locations of fire alarm pull/button stations?	Yes
Through the document review, we confirmed that the orientation training included informing workers of the location of fire alarm pull and button stations.	
8.34b. Does the fire safety training cover informing workers of the locations of fire extinguishers in and near their work area?	Yes
Through both the employee interviews and training records check on health, safety, and fire-fighting we confirmed that the factory has made all of its employees fully aware of the locations of fire extinguishers in and near their work area.	
8.34c. Does the fire safety training cover specific training for workers concerning the dangers of smoke inhalation?	Yes
Through both the employee interviews and training records check on health, safety, and fire-fighting we confirmed that the factory has made all of its employees fully aware of the dangers of smoke inhalation.	
8.34d. Does the fire safety training cover informing workers of the locations of nearest exits and assembly points?	Yes
Through both the employee interviews and training records check on health, safety, and fire-fighting we confirmed that the factory has made all of its employees fully aware of the locations of nearest exits and assembly points.	
8.35. Is worker training conducted for first aid and safety?	Yes
During the documents review, we verified that the first aid and safety awareness training was done externally from August 3~7, 2024 by Egyptian Trade Union Federation; the certificate was valid for 1 year.	
8.36. Are the first aid responders /emergency safety personnel properly trained and identified?	Yes
During the documents review, we verified that the first aid and safety awareness training was done externally from August 3~7, 2024 by Egyptian Trade Union Federation; the certificate was valid for 1 year. The first aid trainees' photos are posted on each first aid kit.	

Audit #: 10915, Factory: Sahinler Egypt - Private Free Zone,

8.37. Have selected workers been trained on the proper use of firefighting equipment?

Yes

During documents review and workers interviews we verified that the factory has trained its workers on fire safety and fire-fighting equipment. The last training was done externally from July 3~4, 2024 by Egyptian Trade Union Federation and the certificate was valid for 1 year and internally on January 5, 2025 by Mr. Mostafa Mahmoud / HSE Officer.

8.38. Have all workers who have any contact with chemicals and hazardous materials been trained on how to safely handle and dispose of specific chemicals and hazardous materials and how to eliminate fire risk?

Yes

During documents review we verified that the workers who deal with chemicals in a direct and indirect way were trained on chemicals safety program and the training was done externally on November 19, 2023 by General union of workers of Egypt and the certificate is valid for 2 years and internally on January 1, 2025 by Mr. Mostafa Mahmoud / HSE Officer.

Fire Safety

8.39a. Does the facility have an emergency evacuation plan, in the language(s) understood by workers, posted in view of the facility's workers?

Yes

Through the onsite walkthrough, we found that the factory had posted the emergency evacuation maps, in workers' language, on all production floors and sections.

8.39b. Does the plan correspond accurately with the facility's actual floor plan?

Yes

During the factory walkthrough, it was verified that the evacuation maps reflect the actual layout of the factory.

8.40a. Does a facility tour verify that emergency exits are in adequate number which meets the law requirements?

Yes

During the factory walkthrough, we confirmed that the factory has an adequate number of emergency exits which meet the law requirements.

8.40b. Does a facility tour verify that emergency exits are in adequate locations?

Yes

During the factory walkthrough, we confirmed that all emergency exits were in adequate locations.

8.40c. Does a facility tour verify that emergency exits are unimpeded, including the path leading to emergency exits?

Yes

During the factory walkthrough, we confirmed that all emergency exits were unimpeded, including the path leading to emergency exits.

8.40d. Evacuation routes/paths are clearly marked?

Yes

During the onsite tour, we verified that some emergency exit aisles were not marked in the cutting workshop and sewing workshop.

Desktop review on March 13th of 2025

On March 13th of 2025, the factory sent us for our review, the photographic evidence of its resolution of this issue, evidence confirming that the factory has now marked the exit aisles in the cutting and sewing workshops.

8.40e. Does a facility tour verify that emergency exits are opening outwards or always secured open during working hours? (If inward opening/sliding/rolling emergency doors are found to be secured open during working hours, raise it as an observation in CAP.)

Yes

During the factory walkthrough, we confirmed that all emergency exits were opening outwards during working hours.

8.40f. Does a facility tour verify that emergency exits are leading to a safe assembly point?

Yes

During the factory walkthrough, we confirmed that emergency exits were leading to a safe assembly point.

8.41. Can assembly point(s) accommodate ALL workers?

Yes

Through the visual inspection of the factory, we found that the assembly point can accommodate all workers.

8.42a. Does a facility tour verify that safety equipment is visible?

Yes

During the factory walkthrough, we noted that all safety equipment was visible.

8.42b. Does a facility tour verify that safety equipment is appropriate in functionality and number?

Yes

During the factory walkthrough, the factory has safety equipment such as 170 fire extinguishers, 40 fire hose reels and 30 fire alarm call points which are appropriate in functionality and number.

8.42c. Does a facility tour verify that safety equipment is properly distributed throughout the facility?

Yes

Based on our on-site audit, we confirmed that all of the factory's safety equipment are properly distributed throughout the factory.

8.42d. Does a facility tour verify that safety equipment is easily accessible?

Yes

Based on our on-site audit, we confirmed that all of the factory's safety equipment are easily accessible and free from any obstacles.

8.42e. Does a facility tour verify that safety equipment is properly mounted?

Yes

Based on our on-site audit, we confirmed that all of the factory's safety equipment are properly mounted on suitable height.

Audit #: 10915, Factory: Sahinler Egypt - Private Free Zone,

8.42f. Does a facility tour verify that safety equipment is unblocked and free of obstruction?

Yes

Based on our on-site audit, we confirmed that all of the factory's safety equipment are unblocked and are free from any obstructions.

8.42g. Does a facility tour verify that fire extinguishers are appropriate for the class(es) of fires possible in the area?

Yes

Based on our on-site audit, we confirmed that all of the factory's fire extinguishers are appropriate for the classes of fires possible in all factory areas.

8.43. Are the fire-fighting water hoses and connections in usable condition?

Yes

During the factory walkthrough, it was verified that the fire-fighting water hoses were in good looking condition and inspected regularly both internally and externally. The factory has 40 hose reels.

8.44. Does the facility have appropriate measures to ensure adequate water pressure for fire-fighting water hoses and sprinkler systems?

Yes

The factory has appropriate measures to ensure adequate water pressure for fire-fighting water hoses and sprinkler valves. For the water line for hose reels and sprinkler valves, they are tested on a monthly basis by the H&S staff. Also, the factory has installed measuring meters in the water pump which can measure the water pressure.

Sprinkler Valves

8.45. Do sprinkler valves appear in good working order? If local/national laws do not require facilities to have sprinklers, state so.

Yes

Through the onsite walkthrough, we found that the sprinkler valves system was installed in the raw materials warehouse and finished goods warehouse and they are in a good working order.

8.46. Are all sprinkler heads kept unobstructed from storage or other materials?

Yes

The sprinkler valves system is kept unobstructed from any storage.

Fire Alarm Boxes

8.47a. Are fire alarms unobstructed and identified?

Yes

Through the onsite tour, we verified that the factory has 30 fire alarm call points spread all over the factory floors and buildings.

8.47b. Does the facility have a test schedule for all fire alarm boxes? State how the facility maintains this schedule.

Yes

WRAP - Audit Report

Rec

Audit #: 10915, Factory: Sahinler Egypt - Private Free Zone,

During the audit, the factory provided us for our review the test schedule for all fire alarm boxes, a schedule that we found to be appropriate. The factory has maintained this schedule on a monthly basis.

8.47c. Do fire alarms have flashing lights?

Yes

Through the onsite tour, we verified that the fire alarm system is supported with flashing lights and was audible as well in all factory premises.

8.47d. Are fire notification mechanisms audible?

Yes

Through the on-site audit, we confirmed that fire notification mechanisms are audible.

Emergency Evacuation

8.48. Are lighting and alarm systems adequate and fitted with back-up systems?

Yes

Emergency lights and alarm system are always kept plugged in, with their batteries charging. If electrical power were interrupted, the batteries would be used to enable the emergency lights and alarm systems to continue functioning.

Emergency Lighting

8.49a. Is appropriate lighting in place in the facility?

Yes

Through a visual inspection of the facility, we verified that the factory has appropriate lighting in place.

8.49b. Is the emergency power system working and in good condition?

Yes

The factory has batteries which are used in case of emergencies and power cut. The emergency operated lights are supported with backup batteries.

8.49c. Does the facility regularly conduct a test to ensure the emergency power system is functioning correctly?

Yes

The emergency lights are tested on a weekly basis during the internal audit system process.

Stairwells

8.50a. Are all stairwell handrails in good condition?

Yes

Through the onsite walkthrough, we verified that the stairwell handrails were in good condition.

8.50b. Are all stair treads in good condition and does its width meet local law?

Yes

Through the onsite walkthrough, we verified that the stairwell treads were in good condition and the width of all

stair treads, meet local law requirements.

8.50c. Are all stair widths in compliance with the requirements of all relevant laws?

Yes

As per legal requirements, Egyptian labor laws and its regulations and civil defense approval, we verified that stairs are in good working condition and the width of all stairs, meet local law requirements.

8.50d. Are the stairways provided with appropriate artificial and emergency lighting?

Yes

Through a visual inspection of the factory, we verified that the stairways are provided with artificial and emergency lighting.

8.50e. Are stairwells completely clear of obstructions?

Yes

Through a visual inspection of the factory's stairwells, we verified that they were completely clear of all obstructions, with no impediments to prompt evacuation in the event of an emergency.

8.50f. Does the facility ensure stairwells are not used for storage?

Yes

Through a visual inspection of the factory's stairwells, we verified that the factory has indeed ensured that stairwells were not being used for storage.

Chemical Safety

8.51. Does the facility have a chemical safety program?

Yes

During documents review, we verified that the factory has chemicals safety program.

8.52. Where applicable, does the facility properly store hazardous/toxic materials?

Yes

The factory has a chemicals storage room where they store machine oils with inventory with limited and authorized access.

8.53. Does the facility have the required government storage and usage permits for chemicals, if required?

Yes

The storage and usage permits for chemicals are included in the business license.

8.54. Does the facility maintain documentation for chemical labeling (including fire safety), chemical usage warnings, and proper handling instructions?

Yes

During onsite walkthrough and documents review, we verified that all chemicals are provided with chemicals labeling, usage warnings and proper handling instructions.

8.55a. Are MSDSs available (in appropriate language(s)) for all chemicals used by the facility?

Yes

Audit #: 10915, Factory: Sahinler Egypt - Private Free Zone,
Address Line 1: 1,12,13,14 Block 10 and 6,7 Block 16 3rd Industrial
Zone, City: New Borg Al Arab, Country: Egypt, Approval Status:

The MSDS were in workers' languages (Arabic).

8.55b. Does the facility have functional eye washing machines if applicable?

Yes

Through the onsite walkthrough, we verified that the eye wash and shower station are provided in the chemicals warehouse.

8.56. Does the facility ensure that all solvent wastes and flammable liquids are properly stored (including being kept in closed containers when not in use) at all times and kept away from potential ignition sources?

Yes

Through a visual inspection of the factory, we verified that the factory stores all solvent wastes and flammable liquid in a defined separate area at the waste area.

8.57 Are the chemical storage areas free of ignition sources, including lamps and lights?

Yes

Through a visual inspection of the factory, we verified that the factory has chemical warehouse which is free from any ignition sources.

Boiler/Compressor/Generator Rooms

8.58a. Is the location of the boiler/compressor/ generator room consistent with all relevant requirements? (If no local or national laws apply, please describe the location of the boiler and compressor room.)

Yes

The factory has 5 compressors located in separate sheds attached to the main buildings. They were well separated from any production area, and they have valid permits and licenses. Moreover, there is no boiler or generator in the factory.

8.58b. Are boilers/compressors/ generators separated from production floor/office space as required by the relevant laws?

Yes

Yes, they were well separated from any production area. Moreover, there is no boiler or generator in the factory.

8.59. Are there housekeeping and maintenance procedures in place for the boiler and compressor rooms? Please describe the nature and execution of these procedures

Yes

The compressors' room was in a good condition and had housekeeping levels and maintenance in place and it was checked on a daily basis.

8.60. Are there any fuel leaks?

No

No fuel leakage was noted in the factory.

8.61. Is the boiler operator certificate valid and authentic?

N/A

N/A, there is no boiler in the factory.

Machine Safety

8.62. Do machines have required safety measures?	Yes
Through the on-site audit, we confirmed that machines have relevant safety measures.	
8.63. Do machines have relevant safety warnings in the language(s) understood by workers/machine operators?	Yes
During the onsite tour, we verified that the sewing machines were not supported with the safety warnings in the workers' language in the sewing workshop. Desktop review on March 13th of 2025 On March 13th of 2025, the factory sent us for our review, the photographic evidence of its resolution of this issue, evidence confirming that the factory has now posted the warning signs on the sewing machines in workers' language in the sewing workshop.	
8.64a. Do machine operators have the required licenses?	Yes
During the documentary review, we verified that the workers who deal with heavy machines and machinery which need work permits all have the necessary licenses and permits.	
8.64b. Do machine operators have the trainings as required by law?	Yes
Through the documentary review, we confirmed that the machine operators received adequate training to operate these machines and had the required licenses before starting their work.	

Shared Building

8.65. Does the facility conduct joint risk assessments with other operations in the building?	N/A
There are no other factories that share the same building with the audited factory.	

Dormitories/Apartments Overview

8.66a. Are there dorms/apartments provided for workers?	No
The factory does not have dormitories.	
8.66b. Are there dorms/apartments provided for management?	No
The factory does not have dormitories.	
8.66c. If Yes to 8.66a and/or 8.66b, are the dormitories/apartments physically separated from the production building(s) and warehouse(s)?	N/A

Quality Plan (Principle 09: Freedom of Association & Collective Bargaining) 

General Questions

Principle 9: Freedom of Association & Collective Bargaining

Facilities will recognize and respect the right of employees to exercise their lawful rights of free association and collective bargaining.

Facilities will respect the freedom of each employee to choose for him- or her-self whether or not to join a workers' association. Facilities cannot discriminate against workers based on whether or not they choose to associate. Both

WRAP - Audit Report

Completed

the facility and the workers shall ensure they conduct themselves in accordance with all relevant laws in this regard. Facilities will ensure an effective mechanism is in place to address any workplace grievances.

9.1 Does the facility have procedures that recognize and respect the right of workers to exercise their lawful rights of free association and collective bargaining?

Yes

The factory has different communication channels for workers to express themselves and exercise their lawful rights of free association such as workers' representative, open door policy and grievance boxes.

9.2a. Which of the following does the facility have: (Note: Facility is required to indicate whether an informal or formal association of workers exists. If a lawful association of workers exists, include a representative of such association in the interview process. Some form of effective mechanism must exist to address workplace grievances.) (List the name of the lead workers' representative (in the union, association, workers' committee, or collective representation of workers.)

Workers' committee

The factory has 7 workers' representatives (males) who were elected on December 27, 2023. The workers' committee is managed by Mr. Mahmoud Ahmed. The committee's name: Sahinler Committee. The name of the workers' representative is Mr. Mahmoud Ahmed.

9.2b. Does this workers' group operate free from coercion or illegal restrictions to its operations?

Yes

In the employees' interviews, no negative comments were raised in relation to this Principle. Therefore, we assume that the Workers' Representative Committee operates free from direct coercion or illegal restrictions to its operations. 1 workers' representative was included in the interview process.

9.2c. Does the facility consult with the worker representatives on any issues that are a requirement by law such as facility disclosures, mass lay-offs, restructuring of the business etc.?

Yes

In the factory's relevant policies, it is clearly specified that the factory should consult with the workers' representative on any issues on the labor-management meetings conducted on a quarterly basis and all issues are discussed and handled in an open manner.

9.2d. Is there any bargaining agreement or labor-management negotiation on workplace issues? Specify what agreement exists.

No

No bargaining agreement in the factory.

9.2e. If yes to 9.2d, how is the CBA/bargaining agreement implemented?

N/A, No bargaining agreement in the factory.

9.2f. If there is an CBA/bargaining agreement, do the terms meet the legal minimum requirements?

N/A

No bargaining agreement in the factory.

Grievance Mechanism

9.3a. Does the facility have a documented grievance mechanism? Describe the mechanism in full, such as Workers' committee/representative/union members, round-table discussion, open door, suggestion box, helpline/hotline, and/or electronic online form, including how grievances are collected by facility designated personnel.	Yes
The factory has different communication channels for workers to express themselves and to exercise their lawful rights of free association, such as workers' representative, open door policy, and grievance boxes. a.The factory has 3 grievance boxes that are located near to lockers and toilets; they are opened on a weekly basis by the HR Officer (Mr. Mohamed Lotfy). b.The workers can use the open door policy to enter directly to the HR Officer or Factory Manager to discuss about their complaints or suggestions about the workplace. The workers' representative meet on a weekly basis to discuss the workers' complaints and suggestions.	
9.3b. Does the facility's responsible person(s) regularly review whether there were submissions of any grievances?	Yes
Mr. Mohamed Lotfy opens the grievance boxes on a weekly basis and meets with workers' representative to see if any complaints come from workers' side as well.	
9.3c. What is the frequency of such review? (Note that the frequency should not be less than once a week.)	On a weekly basis.
9.3d. How does the facility address the grievances in a timely manner?	Mr. Mohamed Lotfy opens the grievance boxes on a weekly basis and meets with workers' representative to see if any complaints come from workers' side as well.
9.3e. Does the facility maintain the records of such review?	Yes
Yes, the factory keeps records of grievance boxes and any complaints come from workers' side through the open-door mechanism.	
9.3f. How many grievances were received in the past 6 months?	No grievances were received during the past 6 months.
9.3g. Does the facility have the resolution policy in place regarding the reported grievances by workers?	Yes
Yes, the factory has a resolution policy in place, as the factory replies and shares the outcome of the grievances with workers after the action taken by the factory.

9.3h. What is the resolution process undertaken by the facility and human resources management in response to the grievances?	The factory shares the outcome of the grievances with workers through written notice or if it is a public situation and workers accept that the factory shares the resolution through the announcement boards.
9.3i. Describe any appeal process available to workers.	During workers' interviews, we verified that the workers can appeal through the HR office or go directly to the HR Manager (Mr. Mohamed Lotfy).
9.3j. Is the grievance mechanism known to ALL workers? (Please provide grievance reference numbers to any evidence of the grievance mechanism being used)	Yes
Through the workers interviews we found that all workers are aware of the grievance mechanism. The factory has different communication channels for workers to express and exercise their lawful rights of free association such as workers' representatives, open door policy and grievance boxes. a.The factory has 3 grievance boxes that are located near to lockers and toilets; they are opened on a weekly basis by the HR Manager (Mr. Mohamed Lotfy). b.The workers can use the open door policy to enter directly to the HR Manager or Factory Manager to discuss about their complaints or suggestions about the workplace. The workers' representatives meet on a weekly basis to discuss the workers' complaints and suggestions.	
9.3k. Are there any penalties to workers associated with using the grievance mechanism?	No
Through the documentary review, we confirmed that there were no penalties associated with using the grievance mechanism.	
9.3l. Describe any confidential reporting channel available to workers.	Through the workers' interview and documents review, we verified that workers can use grievance boxes as confidential reporting channels.
9.3m. Does the facility provide effective grievance mechanism trainings to its managers and supervisors?	Yes
Through the documentary review and workers interview we verified that the factory provides effective grievance mechanism training to its managers and supervisors; the last training took place on January 1, 2025.	
9.4a. If there is a union, are workers aware of the existence of the union? (Name(s) of union(s))	N/A
No union in the factory.

9.4b. Are organization meetings held in the factory premises?

N/A

No union in the factory.

9.5a. Are there formal communication procedures between union/worker representatives/committee members and management? (NOTE: If a facility does not have a union, an answer is still needed.)

Yes

Based on the documentary review, it was verified that the factory has formal communication between workers' representatives and top management.

9.5b. What are the procedures for union/workers' representatives/committee members meeting with management to discuss work-place issues?

In case workers face any problems or have any recommendations regarding workplace issues, they may speak with workers' representatives to discuss these issues, find a solution, and disclose them to management. Workers' representatives conduct monthly meetings with top management to discuss workplace issues and problems. The last two meetings were done on December 28, 2024 and January 29, 2025.

9.5c. Are union/workers' representatives/committee members consulted in establishing safe working conditions?

Yes

Through interviews with workers, we confirmed that workers' representatives are consulted in establishing safe working conditions.

9.5d. Does management respond to union/ workers' representatives/committee members within a defined time?

Yes

Through the workers' interviews and the documentary review, it was verified that the factory responds to workers in a timely manner.

9.6. Does the facility enter into discussions with the workers' representatives in an open manner and within the terms of local/national law? (NOTE: If a facility does not have a union, an answer is still needed.)

Yes

Through the workers' interviews, we confirmed that the factory enters into discussions with the workers' representatives in an open manner and within the terms of local law.

9.7. Are the minutes of facility/worker representative meetings documented and available to the workers? (NOTE: If a facility does not have a union, an answer is still needed.)

Yes

The minutes of meetings are documented and shared with workers and employees through the announcement boards around the factory floors and sections.

9.8. Are workers' representatives elected on a free and confidential basis by the workers without interference from management? If no, what is the election process?

Yes

Through the documents review and the workers' interviews, we verified that workers' representatives are elected on a free and confidential basis by the workers without interference from management, they were elected by workers on December 27, 2023.

9.9a. Does the facility discriminate, harass, or abuse against workers who form or participate in lawful associations?

No

Based on the workers' interviews and our documents review process, we ascertained that the factory does not discriminate, harass, or abuse employees forming or participating in lawful associations.

9.9b. Does the facility discriminate, harass, or abuse against workers who choose not to join any union?

No

Through the workers' interviews, we verified that all workers in this factory are treated equally, regardless of whether or not they are association members.

9.10a. Does the facility communicate its policies and practices pertaining to this Principle to facility workers that may perform recruitment or screening of applicants?

Yes

The policy and procedure "Freedom of Association" were communicated to all workers, which were confirmed through the training records and the worker interviews, but the factory uses no third party to perform recruitment or screening of applicants.

9.10b. Does the facility communicate its policies and practices pertaining to this Principle to Third Parties (e.g., free zone office services, labor brokers/agencies) that may perform recruitment or screening of applicants?

N/A

No recruitment agencies are used by the factory; the hiring processes are done directly through the HR department.

Noncompliances Raised Against This Principle

Were any noncompliances or observations raised against this Principle? If Yes, note whether they are Major, Minor, or Observations:

No

Nil.

Quality Plan (Principle 10: Environment)

Audit Questions and Objective Evidence/Comments

Audit #: 10915, Factory: Sahinler Egypt - Private Free Zone,
Address Line 1: 1,12,13,14 Block 10 and 6,7 Block 16 3rd Industrial
Zone, City: New Borg Al Arab, Country: Egypt, Approval Status:
Completed

Principle 10: Environment

Facilities will comply with environmental rules, regulations and standards applicable to their operations, and will observe environmentally conscious practices in all locations where they operate.

Facilities will ensure compliance with all applicable legally mandated environmental standards, and should demonstrate a commitment to protecting the environment by actively monitoring their environmental practices. In particular, facilities will ensure proper waste management, including monitoring the disposal of any waste material - whether solid, liquid or gaseous - to ensure such disposal is done safely and in a manner consistent with all relevant laws. Facilities are encouraged to minimize their impact on the environment by applying the principles of reduce, reuse and recycle throughout their operations.

10.1. Does the facility have an environmental management system relevant to its industry?

Yes

During the documentary review and management interview we verified that the factory has implemented environmental management systems relevant to its norm of industry. The factory has environmental risk assessment which defines all risks and hazards as per the norm of industry; it was done on January 1, 2025 by Mr. Mostafa Mahmoud / HSE Officer.

10.2a. Does the facility's environmental management system address where and how solid, chemical, sanitary, and waste-water substances are disposed of?

Yes

During the documentary review, we verified that the factory has environmental management systems that address how solid, chemical, waste water and sanitary wastes are disposed of.

10.2b. Does the facility recycle as required by the law?

Yes

There is no legal requirement that forces factories to recycle their wastes, but the factory sends its wastes to approved waste collectors who are responsible for disposing and recycling the solid and hazardous wastes in the right way.

10.3. Does the facility have a program and materials to train relevant individuals on each practice of the environmental management system, including the prevention and control of harmful release of industrial waste into the environment?

Yes

Mr. Mostafa Mahmoud / HSE Officer is the responsible person to monitor and control the wastes and its disposal process. He trained its staff and wastes disposal section's workers on the environmental policies and procedures on a regular basis; the last training was done on January 8, 2025.

10.4a. Does the facility maintain records of emission events?

Yes

As per the documentary review, we confirmed that the factory has conducted environmental measurements on September 1, 2024 by Comibassal Co., which include the emissions records and they were within the approved legal limits.

10.4b. Do emissions meet the permissible standards as defined by the law?

Yes

WRAP - Audit Report

Rec

Audit #: 10915, Factory: Sahinler Egypt - Private Free Zone,
Address Line 1: 1,12,13,14 Block 10 and 6,7 Block 16 3rd Industrial
Zone, City: New Borg Al Arab, Country: Egypt, Approval Status:
Completed

As per the documentary review, we confirmed that the emissions meet the permissible standards as defined by the law.

10.5. Does a review of the following records reveal any irregularities: local government environmental inspection reports, certificates/permits, notices of deficiencies, corrective action notices or plans held by the facility, any correspondence from government officials

No

No irregularities were found during our review of the documentation referred to in 10.5.

10.6. What is the facility's long-term sustainability management plan, including monitoring its water and electricity consumption and utilize renewable energy?

The factory monitors its water and electricity consumption through meters reviewed and paid for by the factory on a monthly basis. There is no renewable energy in the factory.

Noncompliances Raised Against This Principle

Were any noncompliances or observations raised against this Principle? If yes, note whether they are Major, Minor, or Observations:

No

Nil.

Quality Plan ([Principle 11: Customs Compliance](#))

Audit Questions and Objective Evidence/Comments

Principle 11: Customs Compliance

Facilities will comply with applicable customs laws, and in particular, will establish and maintain programs to comply with customs laws regarding illegal transshipment of finished products.

Facilities will ensure that all merchandise is accurately marked or labeled in compliance with all applicable laws. In addition, facilities will keep records for all materials and orders, as well as maintain detailed production records.

11.1. Does the facility keep copies of all applicable customs/trade program laws and regulations?

Yes

The factory keeps copies of all applicable customs laws and regulations in its files and has developed relevant materials to train its administrators and any employees involved with these issues on how to implement the Custom Laws of Egypt and how to be in compliance with the regulations listed in WRAP Principle 11.

11.2a. Does the facility comply with all applicable customs/trade program laws and maintain practices to comply with customs/trade program laws regarding illegal transshipment of products (in the event possible illegal

Yes

WRAP - Audit Report

transshipment activity, appropriate host government agency shall be notified)?

Through a check of the factory's policies and procedures on customs compliance, we verified that all these requirements are covered.

11.2b. Does the facility monitor its productions on a per style basis?

Yes

This requirement is covered in the factory's policies and procedures.

11.2c. Does the facility trace country of origin using records such as production, shipping, verification reports, quality control reports, and individual piecework sheets, for all inputs?

Yes

This requirement is covered in the factory's policies and procedures.

11.2d. Does the facility verify production on an on-going basis at subcontracting facilities, including keeping records of such verification?

N/A

The factory does not subcontract any of its production processes.

11.2e. Does the facility maintain a machine inventory and update it annually?

Yes

This requirement is covered in the factory's policies and procedures.

11.2f. Does the facility ensure that the proper category designation is determined for all goods destined for the US market?

Yes

This requirement is covered in the factory's policies and procedures.

11.3. Does the responsible person ensure that origin determining documents are maintained for at least the period of record retention required by law?

Yes

The factory has a detailed job description for the person responsible for this Principle to ensure origin determining documents are maintained for at least the period of record retention required by the local law.

11.4. Does the facility stay current with possible illegal transshipment activity in the host country through communication with appropriate bodies such as the host government, trade association, etc.?

Yes

This issue is covered in the duties of the responsible person.

11.5a. Does the facility maintain an organized system of production documentation that contains records of the country of origin for all goods produced in the facility?

Yes

Through a check of the relevant documents listed under 11.5, we confirmed that the factory indeed maintains an organized system of production documentation.

WRAP - Audit Report

11.5b. Does the facility maintain an organized system of production documentation that contains a production profile (indicating name, address, production process, production type, and machine inventory) of any subcontracting facility?

N/A

The factory does not subcontract any of its production processes.

11.5c. Does the facility maintain an organized system of production documentation that contains production/purchase orders (with information such as conditions of production, payment, and finished product specifications)?

Yes

These records were made available to us.

11.5d. Does the facility maintain an organized system of production documentation that contains raw material invoices (indicating country of origin of manufacturing facility)?

Yes

These records were made available to us.

11.5e. Does the facility maintain an organized system of production documentation that contains payment proof of raw material, local transportation?

Yes

These records were made available to us.

11.5f. Does the facility maintain an organized system of production documentation that contains shipping/receiving documents (outgoing and incoming records of components/ inputs sent to or received from another facility)?

Yes

These records were made available to us.

11.5g. Does the facility maintain an organized system of production documentation that contains worker work records – accurate records of worker work hours that can be linked to the production of specific products?

Yes

These records were made available to us.

11.5h. Does the facility maintain an organized system of production documentation that contains quality control records (which may include facility name and address, purchase order number, style number, date of the quality check, buyer, name, stamp or signature of an inspector, comments on production)?

Yes

These records were made available to us.

11.5i. Does the facility maintain an organized system of production documentation that contains export documents (including, packing list,

Yes

In this regard, WRAP recognizes the United States Customs and Border Protection (CBP)'s CTPAT Guidelines for Foreign Manufacturers as minimum requirements and has adopted those guidelines under this Principle.

12.1.1a. Does the facility have a security program to ensure the security of its premises, its goods in the facility?

Yes

Through the factory walkthrough and the documentary review, we confirmed that the factory has a security program to ensure the security of its properties and goods.

12.1.1b. Does the facility top management demonstrate their commitment to the program by signing the security statement?

Yes

During the audit, we verified that the top management is committed to following the security procedures inside the factory.

12.1.1c. Is such document posted onsite or shared during security trainings?

Yes

Yes, it is shared during the refresher training courses.

12.1.1d. Does the facility communicate its security program within its facility and also with its business partners? Business partners refer to the entities the facility has business relationship with, in particular, transportation/logistics providers, customers, raw material suppliers, subcontractors, service providers (including IT service providers), etc.

Yes

During the audit, it was verified that the factory communicates its CTPAT policies and procedures with workers and employees through the announcement boards and refresher trainings. Also, the factory communicates its security policies and program with business partners and service providers by sending them emails telling them that they work under WRAP principles and CTPAT requirements.

12.1.2. Does the facility have a cross-functional team from the relevant departments responsible for the implementation and monitoring of its security program? List at least two (2) people and their department from the team:

Yes

The factory has a cross-functional team from relevant departments who are responsible for monitoring security programs headed by Mr. Mahmoud Sharaf (Security Manager) and Mr. Sobhi Atalla (Security Supervisor).

12.1.3. Does the facility have an effective written review process for its security program that is updated promptly when pertinent changes are made in the facility's operation and level of risk?

Yes

During the documents review, we verified that the factory has an effective written review process for its security programs which is updated on a regular basis and when changes are made. The last updated review for the security policies and procedures # Sahinler SOP was on November 5, 2024.

12.1.4a. Does the facility have Point(s) of Contact (POC) – responsible persons - for its security program?

Yes

WRAP - Audit Report

Rec

Audit #: 10915, Factory: Sahinler Egypt - Private Free Zone,
Address Line 1: 1,12,13,14 Block 10 and 6,7 Block 16 3rd Industrial

Completed

We verified that the factory has POC-responsible persons represented in Mr. Sobhi Atalla (Security Supervisor).

12.1.4b. Are these individuals trained to have the necessary knowledge on CTPAT program requirements?

Yes

The security staff, workers, finished goods warehouse, and final packing workshop's workers are trained on security policies and procedures, CTPAT standards. The last awareness training on security policies and procedures was done by Mr. Mahmoud Sharaf (Security Manager) on January 1, 2025.

12.1.4c. Do POCs have a mean of obtaining and validating updates of security requirements?

Yes

During the audit process, it was verified that the POC has means of obtaining and validating the security requirements.

12.1.4d. Do the POCs provide regular updates to top management on issues related to the program, including the progress or outcomes of any audits, security related exercises, and CTPAT validations?

Yes

Yes, the Security Manager (Mr. Mahmoud Sharaf) updates the top management on security issues related to security through security reports and investigations.

Risk Assessment

12.2.1. Has the facility conducted security risk assessment (RA) to identify any security vulnerabilities in its facility and mitigate them by taking the necessary measures?

Yes

During the documents review, we verified that the factory has security risks and potential security risks assessment and analysis report which was conducted on November 5, 2024.

12.2.2. Does your risk assessment document and map the movement of your cargo?

Yes

During the audit, it was verified that the factory documented the movement of cargo and its mapping.

12.2.3. Does the facility review its security risk assessment (RA) at least once a year? (More frequent reviews must be done if risk factors dictate so.)

Yes

Through the documentary review, we verified that the security risk assessment is updated every year and the last report was done on November 5, 2024.

12.2.4. Does the facility ensure risks addressing towards crisis management, business continuity, security recovery plan and business resumption?

Yes

WRAP - Audit Report

Rec

Audit #: 10915, Factory: Sahinler Egypt - Private Free Zone,

Completed

The factory has a written security and CTPAT emergency response plan which addresses crisis management, business continuity and security recovery plan which was updated on November 5, 2024.

Business Partners Security

12.3.1a. Does a written and up-to-date risk-based process exist for screening of new and monitoring of existing business partners?

Yes

We confirmed that a written and up-to-date risk-based process exists for screening of new and monitoring of existing business partners.

12.3.1b. Does the facility address the weaknesses found in its business partners' security assessments?

Yes

We confirmed that the factory addresses the weakness found in its business partners' security assessments.

12.3.1c. Are the actions, taken to mitigate any identified deficiency, effective and in time?

Yes

We confirmed that the actions taken to mitigate any identified deficiency are effective and in time.

12.3.2. If the facility has undergone any CTPAT/AEO (Authorized Economic Operator) audit within the past 24 months, provide the evidence.

The facility has not undergone any CTPAT / AEO (Authorized Economic Operator) audit in the past.

12.3.3. If the facility subcontracts transportation services to a highway carrier, the carrier has to be CTPAT certified. Does the facility meet this requirement? ONLY applicable for land transportation to the US.

N/A

This is not applicable in Egypt.

12.3.4. If a highway carrier works directly for the facility's buyer through a written contract, does the contract stipulate adherence to CTPAT's Minimum Security Criteria (MSC) requirements? ONLY applicable for land transportation to the US.

N/A

This is not applicable in Egypt.

Cybersecurity

12.4.1. Does the facility have written cybersecurity policies and procedures to protect its information technology (IT) systems, including procedures for the recovery (or replacement) of IT systems and/or data if a data breach occurs?

Yes

During the documentary review, it was evident that the factory has written IT / cyber security policies, including

WRAP - Audit Report

security of data and recovery systems.

12.4.2. Does the facility have installed sufficient software/hardware protection from malware and internal/external intrusion (firewalls) in its computer system?

Yes

The factory has installed sufficient software/hardware protection for its IT systems, monitored, controlled, and implemented by Mr. Emad El Din Mohamed / IT Manager.

12.4.3. Does the facility regularly test the security of its IT infrastructure based on the defined frequency (but at the minimum once a year)?

Yes

The IT Manager / Mr. Emad El Din Mohamed conducts regularly tests for IT infrastructure every month.

12.4.4. Does the facility have a system in place to identify unauthorized access of IT systems/data or abuse of policies and procedures?

Yes

During the audit, we confirmed that the factory has a system in place to identify unauthorized access of IT systems / data or abuse of policies and procedures.

12.4.5a. Does the facility restrict user access based on job description or assigned duties?

Yes

During the audit we confirmed that the factory restricts user access based on job description or assigned duties.

12.4.5b. Does the facility require its system users to update their passwords regularly (but at the minimum once a year)?

Yes

During the audit we confirmed that the factory requires its system users to update their passwords every 3 months.

12.4.5c. Does the facility employ secure technologies to safeguard its IT systems used by remote users?

Yes

During the audit we confirmed that the factory employs secure technologies to safeguard its IT systems used by remote users.

12.4.5d. For facility staff using personal devices to conduct company work, does the facility require the staff to adhere to the company's cybersecurity policies and procedures?

Yes

During the audit we confirmed that for factory staff using personal devices to conduct company work, the factory requires the staff to adhere to the factory's cyber security policies and procedures which were last reviewed on January 1, 2025.

12.4.5e. Does the facility remove employee's computer and network access upon ending of employment?

Yes

During the audit we confirmed that the factory removes employee's computer and network access upon ending of employment.

12.4.6. Does the facility follow any international cybersecurity framework, such as National Institute of Standards and Technology (NIST) for

Yes

establishing cyber security protocols? (N/A for US facilities.)

During the audit we confirmed that the factory follows international cyber security framework, such as National Institute of Standards and Technology (NIST) for establishing cyber security protocols. The factory has well organized cyber security systems headed by Mr. Emad El Din Mohamed / IT Manager.

12.4.7. Does the facility back up its data stored in its network at least once a week?

Yes

During the document review, we verified that the factory backs up its stored data on a daily basis.

12.4.8. Does the facility have back-up power for its computer network so the facility can back up the necessary data before the power shuts down?

Yes

All the computers/laptops are supported by UPS to provide computers with needed electricity and back up the necessary data before shut down.

Conveyance & Instruments of International Traffic Security

12.5.1a. If the containers/trucks stay in the facility, does the facility ensure that they are not tampered?

Yes

The factory has empty trucks waiting area which is monitored by CCTV and security guards.

12.5.1b. The containers/trucks are parked in an access-controlled area?

Yes

Yes, they are parked in an access-controlled area.

12.5.2a Does the facility have documented procedures in place to verify the physical integrity of the container structure prior to loading?

Yes

The factory has written procedures to check any coming empty container prior to the loading process.

12.5.2b. Does the procedure include the reliability of the locking mechanisms of the doors?

Yes

Yes, locking mechanisms are checked for each container.

12.5.2c. Prior to loading/stuffing/packing, does the facility conduct 7-point inspection on its containers and unit load devices (ULD) (Select all that apply):

Front wall

Left side

Right side

Floor

Ceiling/Roof

Inside/outside doors, incl. locking mechanisms

Outside/Undercarriage

We verified that the factory performs the 7-Point Container Inspection of each container prior to loading, and the relevant records were made available to us for checking during the document review process, and they were checked at the shipping area as well during the factory walkthrough.

12.5.3a. Does the facility conduct inspections of conveyances at the point of loading/stuffing?

Yes

WRAP - Audit Report

Rec

We ascertained that the factory conducts inspections of conveyances at the point of loading / stuffing.

12.5.3b. If conveyances are stored in the facility, does the facility inspect them when they enter and depart the storage yards?

N/A

During the factory walkthrough, we verified that the factory doesn't store conveyances in the factory.

12.5.3c. Does the facility inspect trailers for the following (Select all that apply):

N/A

Through the management interview and the documentary review, it was noted that the factory doesn't ship the goods by trailers.

12.5.3d. Does the facility conduct inspections of its tractors on the following, if applicable (Select all that apply) (ONLY applicable for land transportation to the U.S.):

N/A

This is not applicable for Egypt.

12.5.4a. Does the facility ensure that conveyances are equipped with external hardware that can reasonably withstand attempts to remove it?

Yes

We ascertained that the factory ensures that conveyances are equipped with external hardware that can reasonably withstand attempts to remove it.

12.5.4b. Prior to attaching any locking device, does the facility inspect a container/truck or any other means of transportation and its locking mechanism to detect tampering?

Yes

Yes, this is done during the 7-points inspection process prior and after goods shipping is done.

12.5.5. Does the facility's security inspection of its conveyances & IIT include the following elements (select all that apply):

Container/Trailer/IIT number

Date of inspection

Time of inspection

Name of employee conducting inspection

Specific areas of IIT that were inspected

During the audit, we confirmed that the factory's security inspection of its conveyances includes the elements list in 12.5.5.

12.5.6a Does the facility perform its security inspections in an area of controlled access and monitored by CCTV if applicable? (Facilities supplying only to local markets or not exporting to the US are not required to have CCTV, but they must have security inspections in the areas with controlled access.)

Yes

It is done at the shipping and loading area which is monitored and guarded with security staff and CCTV of 50 days and 24/7.

WRAP - Audit Report

12.5.6b. Are CCTV records, minimum of 24/7 and 30 consecutive days, kept in sensitive areas (cargo handling and storage areas, yard and storage areas for containers, trucks and trailers, packing areas and entrance/exit)? Facilities supplying only to local markets or not exporting to the US are not required to have CCTV records.

Yes

Through the onsite tour and CCTV review, we found that CCTV has recording history of 50 days and 24/7 and these records are kept in the sensitive areas (IT security room).

Seal Security

NOTE

For the facilities supplying only to local markets, the facilities not direct exporters, or the facilities using Less Than Container Load (LCL) or using local Inland Container Depots (ICDs), only questions 12.6.8, 12.6.9, and 12.6.10a & b are applicable under THIS section.

12.6.1a. Does the facility affix a high-security seal to all loaded trailers and containers bound for the U.S.?

Yes

Through a detailed check of the factory documents, we confirmed that the factory has procedures and processes to affix a high security seal for all trailers. The seals are affixed by customs officials in some cases; seals are kept by the factory only for the clients' seals.

12.6.1b. Do the seals meet or exceed the current ISO 17712 standards for high-security seals?

Yes

The seals used by the factory are in compliance with ISO 17712 standards.

12.6.1c. Does the facility have documented procedures stipulating how seals are to be controlled and affixed to loaded containers and trailers?

Yes

The factory has well-organized and controlled procedures to control and affix seals to loaded containers.

12.6.1d. Does the facility have documented procedures for recognizing and reporting compromised seals and/or containers/trailers to US Customs and Border Protection or the appropriate local authority?

Yes

The factory has documented procedures and systems to report any compromised seals or containers / trailers to US Customs and Border Protection. This is reported to the client, customs officials, US borders and shipping line by the Exporting Manager.

12.6.1e. Does the facility have designated workers for the distribution of seals for integrity purposes?

Yes

The Exporting Manager is responsible person for monitoring and distributing the seals and making sure of its integrity.

12.6.1f. Controlling access to seals must have the following elements (Select all that apply):

WRAP - Audit Report

Rec

Audit #: 10915, Factory: Sahinler Egypt - Private Free Zone,
Address Line 1: 1,12,13,14 Block 10 and 6,7 Block 16 3rd Industrial
Zone, City: New Borg Al Arab, Country: Egypt, Approval Status:
Completed

Seals managed only by authorized personnel

Secure storage

Seal log recording the receipt of new seals

Issuance of seals recorded in log

Track seals via the log

Only authorized personnel may affix seals to IIT

During the audit, we confirmed that the controlling access to seal have the elements list in 12.6.1f.

12.6.2. Does the Seal security policy and procedure include "controlling seals in transit" and "seals broken in transit"?

Yes

The Seal security policy and procedure includes "controlling seals in transit" and "seals broken in transit".

12.6.3a. If seals are found broken in transit, the following must be done: If a load is examined, record replacement seal number.

Yes

Through a detailed check of the facility documents, we confirmed that the facility has an appropriate program to handle seals broken in transit. If seals are found broken in transit, and if a load is examined, the facility records replacement seal number.

12.6.3b. If seals are found broken in transit, the following must be done: The driver must immediately notify dispatch when a seal is broken, indicate who broke it, and provide the new seal number.

Yes

Through a detailed check of the facility documents, we confirmed that the facility has an appropriate program to handle seals broken in transit. If seals are found broken in transit, the driver must immediately notify dispatch when a seal is broken, indicate who broke it, and provide the new seal number.

12.6.3c. If seals are found broken in transit, the following must be done: The carrier must immediately notify the shipper, broker, and importer of the seal change and the replacement seal number.

Yes

Through a detailed check of the facility documents, we confirmed that the facility has an appropriate program to handle seals broken in transit. If seals are found broken in transit, the carrier must immediately notify the shipper, broker, and importer of the seal change and the replacement seal number.

12.6.3d. If seals are found broken in transit, the following must be done: The shipper must note the replacement seal number in the seal log.

Yes

Through a detailed check of the facility documents, we confirmed that the facility has an appropriate program to handle seals broken in transit. If seals are found broken in transit, the shipper must note the replacement seal number in the seal log.

12.6.4a. Seal discrepancies are found: Does the facility retain altered or tampered seals to aid in investigations?

Yes

The factory retains altered or tampered seals to aid in investigations if seal discrepancies are found.

12.6.4b. Seal discrepancies are found: Does the facility investigate the discrepancy and follow-up with corrective measures (if warranted)?

Yes

Audit #: 10915, Factory: Sahinler Egypt - Private Free Zone,
Address Line 1: 1,12,13,14 Block 10 and 6,7 Block 16 3rd Industrial
Zone, City: New Borg Al Arab, Country: Egypt, Approval Status:
Completed

The factory investigates the discrepancy and follow-up with corrective measures (if warranted) when seal discrepancies are found.

12.6.4c. Seal discrepancies are found: If applicable, does the facility report compromised seals to CBP and the appropriate foreign government to aid in the investigation?

N/A

This is not applicable in Egypt.

12.6.5. Are all shipments sealed right after loading/stuffing/packing?

Yes

All shipments are sealed right after loading / stuffing / packing then the factory gets the approval of customs officials before the shipping process.

12.6.6a. Does the facility maintain an inventory of seals?

Yes

Through the documentary review, we found that the factory has inventory of seals.

12.6.6b. If yes to 12.6.6a, does the facility management or a security supervisor conduct audits of seals that includes periodic inventory of stored and reconciliation against seal inventory logs and shipping documents?

Yes

The seal check is done and covered during the security check which is done on a regular basis.

12.6.7a. Does the facility seal verification process followed the V.V.T.T. process: V – View seal and container locking mechanisms; ensure they are OK

Yes

Through a detailed check of the documents, we confirmed that the factory seal verification process followed the VTT process.

12.6.7b. Does the facility seal verification process followed the V.V.T.T. process: V – Verify seal number against shipment documents for accuracy

Yes

Through a detailed check of the documents, we confirmed that the factory seal verification process followed the VTT process.

12.6.7c. Does the facility seal verification process followed the V.V.T.T. process: T – Tug on seal to make sure it is affixed properly

Yes

Through a detailed check of the documents, we confirmed that the factory seal verification process followed the VTT process.

12.6.7d. Does the facility seal verification process followed the V.V.T.T. process: T – Twist and turn the bolt seal to make sure its components do not unscrew, separate from one another, or any part of the seal becomes loose

Yes

Through a detailed check of the documents, we confirmed that the factory seal verification process followed the VTT process.

Audit #: 10915, Factory: Sahinler Egypt - Private Free Zone,
Address Line 1: 1,12,13,14 Block 10 and 6,7 Block 16 3rd Industrial
Zone, City: New Borg Al Arab, Country: Egypt, Approval Status:
Completed

NOTE

The following questions are applicable to the facilities supplying only to local markets, the facilities not direct exporters, or the facilities using Less Than Container Load (LCL) or using local Inland Container Depots (ICDs).

12.6.8. Does the facility apply a locking device to all its shipments right after loading/stuffing/packing?

Yes

The factory supplies some of its products to the local markets and apply the locking device to all its shipments right after loading/stuffing/packing and does not use LCL.

12.6.9. Does the facility maintain records of the locking devices as required by the applicable custom rules or for at least 3 months?

Yes

The factory supplies some of its products to the local markets and they maintained the records of the locking devices for at least 3 months and does not use LCL.

12.6.10a. Does the facility record any broken locking device incidents and take the necessary preventative measures?

Yes

The factory supplies some of its products to the local markets and they recorded any broken locking device incidents and take the necessary preventative measures.

12.6.10b. Does the facility have the procedures to address any incidents occurred during transit?

Yes

The factory supplies some of its products to the local markets and they have the procedures to address any incidents occurred during transit.

Procedural Security

12.7.1. Does the facility have security officer/manager or other designated personnel during the loading/stuffing of cargo into containers/trucks?

Yes

The factory has Mr. Sobhi Atalla, the Security Supervisor, during the loading / stuffing of cargo into containers / trucks.

12.7.2. Does the facility have procedures in place to ensure complete and necessary information in clearing of merchandise/cargo? (Not applicable to non-exporting facilities.)

Yes

Through a detailed check of the factory documents, we confirmed that the factory has procedures in place to ensure complete and necessary information in clearing of merchandise / cargo.

12.7.3. Does the facility verify the accuracy of the information in the bill of lading (BOLs) and/or manifests with the shipper or its agent? (Not applicable to non-exporting facilities.)

Yes

During the audit, we confirmed that the factory verified the accuracy of the information in the bill of lading (BOLs) and/or manifests with the shipper or its agent.

12.7.4. Does the facility have written procedures for reporting an incident? (Note: The report must include a description of its internal escalation process.)	Yes
We ascertained that the factory has written procedures for reporting an incident.	
12.7.5. Does the facility have documented procedures in place to identify, challenge and address unauthorized/unidentified persons?	Yes
Through the onsite walkthrough, we found that the factory had posted the list of the authorized persons in the loading area.	
12.7.6. Does the facility investigate and resolve any shortages, overages and other significant discrepancies or anomalies?	Yes
If anomalies, illegal or suspicious activities are detected, the factory would notify customs and/or other appropriate law enforcement agencies at once.	
12.7.7a. Is cargo that is being shipped reconciled against information on the cargo manifest?	Yes
Through a detailed check of the records for the cargo being shipped and the cargo manifest, we verified that no abnormalities were found.	
12.7.7b. Is all cargo accurately described, and are the weights, labels, marks, and piece count indicated and verified?	Yes
Through a detailed check of the delivery order, we confirmed that all cargo is accurately described, and the weights, labels, marks, and piece count are indicated and verified by the relevant personnel.	
12.7.7c. Does the facility verify departing cargo against purchase or delivery orders?	Yes
Prior to shipment the factory always verifies departing cargo against purchase or delivery orders.	
12.7.7d. Are drivers delivering or receiving cargo positively identified before cargo is received or released?	Yes
Through a detailed check of the relevant records, we confirmed that in this factory before cargo is received or released it is positively identified by delivering or receiving drivers.	
12.7.7e. Are documented procedures in place to track the timely movement of incoming and outgoing goods?	Yes
The factory has developed procedures in place to track the timely movement of incoming and outgoing goods.	

Agricultural Security

12.8.1. Does the facility have written procedures designated to prevent visible pest contamination to include compliance with Wood Packaging	Yes
--	-----

WRAP - Audit Report

Materials (WPM) regulations?

We verified that the factory has written procedures designated to prevent visible pest contamination to include compliance with Wood Packaging Materials (WPM) regulations. These procedures were updated on November 5, 2024.

12.8.2. Does the facility inspect its cargo staging areas and its immediate surrounding areas to ensure these areas remain free of visible pest contamination?

Yes

The factory inspects its cargo areas and its surroundings through an approved 3rd party to do pest control service company ((M.M.A Service for Pest Control); the contract was issued on January 1, 2025; it was automatically renewed; and they do onsite monthly checks to the factory and the last check was on January 1, 2025.

12.8.3a. Has pest contamination been found during the conveyance/instruments of international traffic inspection?

No

We verified that pest contamination has not been found during the conveyance/ instruments of international traffic inspection.

12.8.3b. If yes to 12.8.3a, was washing/vacuuming carried out to remove such contamination?

N/A

No pest contamination was found during the conveyance/instruments of international traffic inspection.

12.8.4. Has the facility maintained the records of its pest contamination removal activities for at least one (1) year?

Yes

The records of pest control service are kept for the past 1 year.

Physical Access Controls

12.9.1a. Does the facility have a physical access control procedure for cargo handling and storage facilities?

Yes

We confirmed that the factory has a physical access control procedure in place.

12.9.1b. Do the facility's cargo handling and storage facilities have physical barriers and/or deterrents that prevent unauthorized access? If no, describe what measures are in place to prevent unauthorized access.

Yes

We confirmed that the factory's cargo handling and storage facilities have physical barriers and/or deterrents that prevent unauthorized access.

12.9.2a. Is there perimeter fencing enclosing the areas around cargo handling and storage facilities?

Yes

During the audit we observed that there is perimeter fencing enclosing the areas around cargo handling and storage facilities.

12.9.2b. Is interior fencing within a cargo handling area used to segregate domestic, international, high value, and hazardous cargo?

Yes

During the inspection of the factory we observed that interior fencing within a cargo handling area is used to segregate domestic, international, high value, and hazardous cargo.

12.9.2c. Is all fencing regularly inspected for integrity and damage?

Yes

The factory had regularly inspected all the fencing for integrity and damage.

12.9.3. Are gates through which vehicles and/or personnel enter or exit manned and/or monitored? The number of gates should be kept to the minimum necessary for proper access and safety.

Yes

During the inspection of the factory we confirmed that there are security guards stationed at the gates through which vehicles and/or personnel enter or exit and that the number of gates is kept to the minimum necessary for proper access and safety.

12.9.4. Are private passenger vehicles prohibited from parking in or adjacent to cargo handling and storage areas?

Yes

Based on our inspection of the factory we confirmed that it strictly prohibits private vehicles from accessing the cargo handling and storage areas.

12.9.5. Is there adequate lighting provided inside and outside the facility including the following areas: entrances and exits, cargo handling and storage areas, fence lines and parking areas?

Yes

We verified that there is adequate lighting throughout the factory, inside and out, including the following areas: entrances and exits, cargo handling and storage areas, fence lines and parking areas.

12.9.6. Does the facility ensure its security technology physical infrastructure from unauthorized access?

Yes

The factory ensures its security technology physical infrastructure from unauthorized access.

Physical Security

12.10.1a. Does the facility have written procedures governing how identification badges and access devices are granted, changed and removed?

Yes

The factory has written procedures governing how identification badges and access devices are granted, changed and removed, and it was confirmed through the onsite-tour, we found that workers were wearing ID tags while working.

12.10.1b. Does the facility restrict access to sensitive areas based on job description or assigned duties? Sensitive areas include cargo handling and storage areas, yard and storage areas for containers, trucks and trailers,

Yes

WRAP - Audit Report

packing areas and entrance/exit, IT server rooms, shipping/receiving areas
where import documents are kept, and seal storage areas.

We verified that the factory restricts access to sensitive areas based on job description or assigned duties.

12.10.1c. Does the facility remove access of devices upon the employee's
end of employment?

Yes

We confirmed that the factory removes access of devices upon the employee's end of employment.

12.10.2. Are visitors required to register at the main entrance and provided proper visitor bages? (Select all elements
that facility's visitor log includes)

Provided visitor badge

Date of visit

Visitor's name

Verification of photo identification

Time of arrival

Company point of contact

Time of departure

Visitor's signature

Through the on-site audit we confirmed that visitors are required to register at the main entrance and provided with
proper visitor badges, and the factory visitor log included the information list in the above.

12.10.3. Does the facility require positive identification from driver before
cargo is received or released?

Yes

We verified that the factory requires positive identification from driver before cargo is received or released.

12.10.4a Does the facility keep a cargo pickup log?

Yes

We confirmed that the factory keeps a cargo pickup log.

12.10.4b. Does the facility personnel (not cargo drivers) log in and out of
cargo drivers?

Yes

We verified that the factory personnel logs in and out of cargo drivers.

12.10.4c. Is the cargo log securely kept?

Yes

We verified that the cargo log is securely kept.

12.10.4d. Does the cargo pickup log have the following items recorded (Select all that apply)?

Driver's name

Date and time of arrival

Employer

Truck number

Time of departure

Seal # affixed to shipment at time of departure

We confirmed that the cargo pickup log has the item recorded listed in 12.10.4d. Trailer Number: N/A as through the
management interview and the documentary review, it was noted that the factory doesn't ship the goods by trailers.

12.10.5. Does the facility require carrier to make deliveries and pickups by
appointment only with driver's name and truck number?

Yes

We confirmed that the factory requires carrier to make deliveries and pickups by appointment only with driver's
name and truck number.

12.10.6. Does the facility have documented procedures in place to check mails and parcels upon arrival?

Yes

Through the documentary review, we confirmed that the factory has documented procedures in place to check mails and parcels upon arrival.

12.10.7. If the facility use security guards, does it have written policies and procedures for security guards' work instructions?

Yes

We verified that the factory has written policies and procedures for security guards' work instructions.

Personnel Security

12.11.1. Does the facility verify applicant's employment history and conduct reference checks prior to hiring, to the extent possible and allowed under the law?

Yes

The Personnel Department in this factory conducts background checks and investigations for prospective employees by means of the assistance of the local Security Bureau. The contents of background checks and investigations include whether the prospective employees had criminal records or had a joint unknown party.

12.11.2. Once employed, are periodic checks and reinvestigations performed based on cause, and/or the sensitivity of the worker's position?

Yes

Through the documentary review and the management interviews, we found that the factory conducts periodic checks for workers who work in sensitive positions such as security staff.

12.11.3. Does the facility have a code of conduct for security personnel?

Yes

Through documents review, we verified that the factory has a code of conduct and security policies for security staff.

Education, Training & Awareness

12.12.1a. Has the facility established and maintained a security training and awareness program, including code of conduct training for security personnel, for its personnel in sensitive areas and positions?

Yes

We confirmed that the factory has established and maintained a security training and awareness program including code of conduct to train its security personnel in sensitive areas and positions.

12.12.1b. Does the facility keep training records which include the date of the training, names of attendees and the topics of the training?

Yes

We confirmed that the factory keeps the training records which include the date of the training, names of attendees and the topics of the training.

12.12.2a. Does the facility train its relevant personnel who conduct security inspections of empty conveyances and Instruments of International Traffic

Yes

WRAP - Audit Report

(IIT)?

We confirmed that the factory trains its relevant personnel who conduct security inspections of empty conveyances and Instruments of International Traffic (IIT).

12.12.2b. Does the facility training contain the following contents (Select all that apply):

Signs of hidden compartments

Concealed contraband in compartments

Signs of pest contamination

We verified that the factory training contains the contents listed in 12.12.2b.

12.12.3. Does the facility train its relevant personnel on its cybersecurity policies and procedures?

Yes

The factory has 58 computer users.

During the documents review and management interview, we verified that the factory did not train its relevant personnel on its cyber security policies and procedures.

Desktop review on March 13th of 2025

On March 13th of 2025, the factory sent us for our review, the photographic evidence of its resolution of this issue, evidence confirming that the factory has now trained its relevant personnel on its cyber security policies and procedures on March 12, 2025.

12.12.4. Does the facility train its relevant personnel operating and managing security technology systems?

Yes

We verified that the factory trains its relevant personnel operating and managing security technology systems.

12.12.5. Does the facility train its relevant personnel on how to report security incidents and suspicious activities?

Yes

We verified that the factory trains its relevant personnel on how to report security incidents and suspicious activities.

Noncompliances Raised Against This Principle

Were any noncompliances or observations raised against this Principle? If yes, note whether they are Major, Minor, or Observations:

No

1 minor non-compliance was observed in this principle as the following:

1. During the documents review and management interview, we verified that the factory did not train its relevant personnel on its cyber security policies and procedures.

Desktop review on March 13th of 2025

On March 13th of 2025, the factory sent us for our review, the photographic evidence of its resolution of this issue, evidence confirming that the factory has now trained its relevant personnel on its cyber security policies and procedures on March 12, 2025.
